

CONSULTATION DOCUMENTATION

CONSULTATION SO FAR.....

- Comprehensive consultation with wide range of Census users
- **Spring 1999 (1st Round)** - 200 organisations, 6,000 comments
- **February 2000 (2nd Round)** - 100 organisations, 2,400 comments
- **August 2000 (3rd Round)** - 150 organisations, 3,500 comments
- **November 2001 (Final Round)** - ?? organisations, ?? comments

CONSULTATION DOCUMENTATION

- Discussion paper
- Classifications
- Master Index
- Key Statistics
- Standard Tables
- Census Area Statistics
- Origin-Destination Statistics

Discussion Paper

User comments particularly required on:

- the methodology being used as the homogeneity criteria for the creation of Output Areas (OAs) – (paragraphs 47- 51)
- the requirement to subdivide Output Areas into multiple workplace OAs - (paragraphs 57 and 58)
- the research and requirement for comparability between 1991 Enumeration Districts and 2001 Census Output Areas – (paragraphs 72 and 73)
- suggestions for other non-tabular formats for output – (paragraph 115)
- to indicate preferences for the options for release of tranches of output – (paragraphs 132 and 133)

OR ON ANY OTHER POINTS

Classifications

- Revised version following 1999 version
- Sets out the full and final data classifications for output
- Includes standard Census derived variables, definitions and concepts

FINAL version on standard classifications - no further scope for consultation and revision

Master Index

- Help users find their way around the standard area statistics - Key Statistics, Standard Tables and CAS
- Identify a particular variable across the range of standard area statistics
- Facilitate final round of consultation on the CAS
- Use in conjunction with the Classifications document
