

Census 2001: Output Area to Higher Areas Look-up File

Introduction

This CD contains an Output Area (OA) to higher areas look-up file together with associated names look-up files. These files will allow OAs to be aggregated to form higher level areas such as Parliamentary Constituencies, Health Areas etc. Information is included for standard administrative, health administration and electoral geographies. Information on sub-threshold areas, which have been combined for the purposes of Census output, is also provided.

Where higher level areas do not match OAs exactly OAs have been best fitted to match based on where the largest population is situated.

Conditions of Supply

There are no restrictions on the use of the information contained on this CD.

Files on this CD

The files contained on this CD are in TXT format, with the exception of the main OA to Higher Areas Interim files, which are supplied in three parts in TXT, and XLS (Excel) format.

The data contained in each file is as specified below.

Table Name **OA_TO_HIGHER_AREAS**

Description This table lists the 2001 Census Output Areas and the associated geography information

Field Name	Type/Size	Range	Comments
OACODE	Char(10)	00AFA0001 – 47UGGM0016	An alphanumeric code that identifies a Census Output Area The code is comprised of: County_code District_code Ward_code Sequence number (0001-9999) within a ward

WELSH_ASSEMBLY_NAME			Name associated with Welsh Assembly Area.

* Not all values within these ranges are used.

+ See section on sub-threshold areas below

Sub-threshold Areas

Special arrangements have been made for wards (electoral divisions in Wales) and parishes (communities in Wales) which are too small for the release of the usual output for such areas.

Wards below Standard Table threshold but not below CAS threshold (STANDARD_WARD)

Wards below the Standard Table threshold (1,000 people and 400 households) but not below the CAS threshold (100 people and 40 households) have been amalgamated with another ward within that Local Authority for the purposes of Standard Tables. CAS tables and Key Statistics will be produced for the individual wards themselves.

The file standard_wards.txt contains a list of wards amalgamated for the purposes of Standard Tables.

Table Name STANDARD_WARDS**Description** This is a look-up table for wards amalgamated to form standard_wards

Field Name	Type/Size	Range	Comments
COUNTY_CODE	Char(2)	000,09-47*	A code that uniquely identifies a county
DISTRICT_CODE	Char(2)	AA-PT*, UB-UQ*	A code that when added to the county code uniquely identifies a district
WARD_CODE	Char(2)	FA-ZZ	A code that when linked to the county and district code, uniquely identifies a ward
CONCATENATED_WARD_CODE	Char(6)		Concatenation of the above county_code, district_code and ward_code
JOINED_AREA	Char(6)		Concatenation of county_code, district_code and ward_code for the amalgamated ward and equates to the standard_ward

Wards below CAS thresholds (CAS_WARD)

Wards below the CAS threshold (100 people and 40 households) have been amalgamated with another ward within that Local Authority for the purposes of Standard Tables. Such wards will also be amalgamated with other wards within the Local Authority for purposes of OA creation. CAS tables and Key Statistics will be produced for the OA.

A Sub-threshold Area Profile will be produced for the small ward where this does not allow the deduction of corresponding results for any part of the OA with less than 40 people and 20 households. If a Profile cannot be produced for that reason, counts of males, females and the number of households with one or more residents in the ward will be supplied.

The file cas_wards.txt contains a list of wards amalgamated for the purposes of OA creation.

Table Name CAS_WARDS**Description** This is a look-up table for wards amalgamated to form cas_wards

Field Name	Type/Size	Range	Comments
COUNTY_CODE	Char(2)	000,09-47*	A code that uniquely identifies a county
DISTRICT_CODE	Char(2)	AA-PT*, UB-UQ*	A code that when added to the county code uniquely identifies a district
WARD_CODE	Char(2)	FA-ZZ	A code that when linked to the county and district code, uniquely identifies a ward
CONCATENATED_WARD_CODE	Char(6)		Concatenation of the above county_code, district_code and ward_code
JOINED_AREA	Char(6)		Concatenation of county_code, district_code and ward_code for the amalgamated ward and equates to the cas_ward

Table Name CAS_WARDS_2001**Description** This is a look-up table for wards amalgamated to form cas_wards as at census day 29/4/2001

Field Name	Type/Size	Range	Comments
COUNTY_CODE_2001	Char(2)	000,09-47*	A code that uniquely identifies a county
DISTRICT_CODE_2001	Char(2)	AA-PT*, UB-UQ*	A code that when added to the county code uniquely identifies a district
WARD_CODE_2001	Char(2)	FA-ZZ	A code that when linked to the county and district code, uniquely identifies a ward
CONCATENATED_WARD_CODE	Char(6)		Concatenation of the above county_code, district_code and ward_code
JOINED_AREA	Char(6)		Concatenation of county_code, district_code and ward_code for the amalgamated ward and equates to the cas_ward

Parishes below CAS threshold (CAS_PARISH)

Parishes below the CAS threshold (100 people and 40 households) will be amalgamated with another parish(es) or part of a parish, or a non parished area if no parish is contiguous within the Local Authority, for the purposes of OA creation. Two or more sub threshold parishes will be amalgamated where possible. CAS tables will be produced for the OA.

A Sub-threshold Area Profile will be produced for the small parish where this does not allow the deduction of corresponding results for any part of the OA with less than 40 people and 20 households. If a Profile cannot be produced for that reason, counts of males, females and the number of households with one or more residents in the parish will be supplied.

The file cas_parishes.txt contains a list of parishes amalgamated for the purposes of OA creation.

The file all_parishes.txt contains a list of all parishes and identifies what level of statistics will be available for each single or amalgamated parish. This file compliments the cas_parishes.txt file.

Table Name CAS_PARISHES**Description** This is a look-up table for parishes amalgamated to form cas_parishes

Field Name	Type/Size	Range	Comments
COUNTY_CODE	Char(2)	000,09-47*	A code that uniquely identifies a county
DISTRICT_CODE	Char(2)	AA-PT*, UB-UQ*	A code that when added to the county code uniquely identifies a district
WARD_CODE	Char(2)	FA-ZZ	A code that when linked to the county and district code, uniquely identifies a ward
PARISH_CODE	Char(3)	001 – 999 and 0	A code that when linked to the county and district code, uniquely identifies a parish and when linked to the ward_code identifies a parish part within that ward
OACODE	Char(10)	00AAFA0001 – 47UGGM0016	An alphanumeric code that identifies a Census Output Area The code is comprised of: County_code District_code Ward_code Sequence number (0001-9999) within a ward
CAS_PARISH	Char(3)	001 – 009 and 0	A code that identifies an area that can comprise a parish, part parish and/or non parished area that is above the 100/40 threshold for CAS and KS

Table Name ALL_PARISHES**Description** This is a look-up table for all parishes and identifies the statistics available

Field Name	Type/Size	Range	Comments
