Office for National Statistical Service

The Office for National Statistics (ONS) is the Government Agency responsible for compiling, analysing and disseminating many of the United Kingdom's economic, social and demographic statistics including the retail price index, trade figures and labour market data as well as the periodic census of the population and health statistics. The head of ONS is also Registrar-General for England and Wales and the agency carries out all statutory registration of births, marriages and deaths in England and Wales.

ONS was formed in April 1996 from a merger of the Central Statistical Office and the Office of Population Censuses and Surveys. The Agency is independent of any other Government Department and is accountable to the Chancellor of the Exchequer.

Government Statistical Service

ONS works in partnership with others in the Government Statistical Service (GSS) located throughout many different Government Departments. Together they provide a quality statistical service to a great many users, and this is reflected in the GSS Mission Statement:

"To provide Parliament, government and the wider community with the statistical information, analysis and advice needed to improve decision making, stimulate research and inform debate".

Each Department produces its own statistical publications, and the Office for National Statistics brings many of these statistics together in its compendia publications and databases. For further information on the source Departments, contact the ONS Public Enquiry Service on 0171-533 6262/6363/6364.

PCC 33101653	Mechano-therapy appliances; massage apparatus; psychological aptitude-testing apparatus EXCLUDING: - wholly stationary mechano-therapy apparatus	39
PCC 33101655	Ozone therapy, oxygen therapy, aerosol therapy, artificial respiration or other therapeutic respiration apparatus INCLUDING: - appliances used instead of manual methods of artificial respiration - oxygen therapy appliances proper - iron lungs and the like	40

PCC 33101690	41
Breathing appliances and gas masks INCLUDING: - anti-radiation or anti-contamination protective suits incorporating breathing apparatus EXCLUDING: - ozone, oxygen or aerosol therapy, artificial respiration or other therapeutic respiration apparatus - protective masks having neither mechanical parts nor replaceable filters - masks for administering anaesthetics - swimmer or diver snorkels	
PCC 33101735	42
Artificial joints	
PCC 33101739	43
Orthopaedic appliances and other fracture appliances INCLUDING: - splints; surgical belts and trusses; crutches and crutch-sticks - orthopaedic appliances for animals EXCLUDING: - walking-sticks; stockings for varicose veins; simple protectors or devices designed to reduce pressure on certain parts of the foot; pre-natal or maternity belts; mass produced footwear with insoles which have been arched to alleviate flat-footedness	
PCC 33101753	44
Individual artificial teeth of plastics INCLUDING: - metal posts for fixing EXCLUDING: - dentures or part dentures	
PCC 33101755	45
Individual artificial teeth not made of plastics INCLUDING: - metal posts for fixing EXCLUDING: - dentures or part dentures	
PCC 33101759	46
Dental fittings INCLUDING: - dentures and part dentures - metal crowns - cast tin bars - stainless steel bars EXCLUDING: - individual artificial teeth	
PCC 33101790	47
Artificial parts of the body EXCLUDING: - artificial teeth and dental fittings - artificial joints - orthopaedic and fracture appliances - heart pacemakers	
PCC 33101833	48
Appliances for overcoming deafness EXCLUDING: - parts and accessories	
PCC 33101839	49
Parts and accessories of hearing aids EXCLUDING: - for headphones, amplifiers and the like	
PCC 33101850	50
Pacemakers for stimulating heart muscles EXCLUDING: - parts and accessories	
PCC 33101890	51
Parts and accessories of orthopaedic appliances, splints and other fracture appliances, artificial parts of the body and other appliances which are worn, carried or implanted in the body EXCLUDING: - for appliances for overcoming deafness - for heart pacemakers	
PCC 33102030	52
Dentists', barbers' or similar chairs and parts thereof EXCLUDING: - dentists' spittoon mouth rinsers - chairs incorporating dental appliances	
PCC 33102050	53
Medical, surgical or veterinary furniture, and parts thereof EXCLUDING: - tables and seats specialised for X-ray purposes	
PCC 33109100	54
Installation of medical and surgical equipment	
PCC 33109200	55
Repair and maintenance of medical and surgical equipment	

What does this report contain?

The Product Sales and Trade annual series of reports contains data on the sales by UK based manufacturers of individual products covered by the PRODCOM inquiry, together with exports and imports data.

The PRA series of reports contains the data for the industries surveyed annually as well as data from industries surveyed quarterly which are directly relevant for these industries. The data for the industries surveyed on a quarterly basis are available separately.

What is PRODCOM?

The term PRODCOM is derived from PRODUcts of the European COMMunity. This is a survey based on products whose definitions are standardised across the EC to allow comparability between the member countries' data.

What does PRODCOM cover?

PRODCOM covers some 4,800 products which in the UK are assigned to some 250 industries (subclasses) as defined by the 1992 Standard Industrial Classification SIC(92). Some 200 industries are surveyed annually with the remaining 50 being surveyed on a quarterly basis.

What is SIC(92)?

The Standard Industrial Classification is used to classify business establishments and other statistical units by the type of economic activity in which they are engaged. The present 1992 revision is based on the activity classification issued by the Statistical Office of the European Communities (Eurostat), known as the NACE classification.

Who collects the trade data?

The trade data (exports and imports) are collected by HM Customs & Excise and measure the flow of goods into and out of the UK.

Total exports and imports are broken down into intra and extra EC trade ie. trade with members of the EC, and trade with countries outside the EC.

Intra EC trade data are collected by INTRASTAT, a survey based system operated by Customs covering the largest traders. Extra EC trade data are collected from information given on Customs documentation which has to accompany goods passing through border controls.

What data are shown?

Data on both the value and volume of UK manufacturers' sales are collected for most products, and these are also aggregated to product totals for the industry. All estimates are for the total manufacturing activity of all firms in the UK and not just for those firms selected for the survey.

The data for each industry (subclass) is shown in a series of three tables; Sales and Turnover, Principal Products and Trade and Individual Product Tables. See below for further explanation of the different types of table.

Industry Sales and Turnover

The Sales and Turnover table shows the relationship between the total turnover of companies classified to that industry and the total sales of the principal products of that industry. The difference is turnover generated from non-production activity, and the effect of 'carry-in' and 'carry-out' sales to the industry. See below for further explanation of these.

What are Principal Products?

Firms are classified to an industry (a 5-digit subclass under the Standard Industrial Classification SIC(92)) according to their main economic activity. Principal Products are those products classified to an industry (subclass) and are the products mainly produced by firms classified to that industry.

Each individual product has an 8 digit code assigned to it; the first 4/5 digits indicate the industry for which it is one of the Principal Products. The product code is known as the PRODCOM Commodity Code (PCC).

For example:

5-digit industry Under Sic(92)	Industry title	Principal products	
35300	Aircraft and Spacecraft	35301600	Parts of turbo jets or turbo propellers
		35304000	Spacecraft, satellites and launch vehicles
		35309100	Repair and maintenance of aircraft and aircraft engines

What items of non-production activity are shown?

Merchanted goods - These are manufacturers' sales of goods which have not been subjected to any manufacturing process.

Work done - Revenue is recorded under 'work done' when a manufacturer conducts work on materials which have been supplied to them by a customer.

Waste products - Manufacturers' sales of products and residues which were considered as being waste.

All other income - Revenue derived from the provision of services and other non-production activity not specified elsewhere.

What are 'carry-in' and 'carry-out' sales?

Other than production of their Principal Products, an industry may have some secondary production, ie. production of non-principal products. These sales are known as 'carry-out' product sales as they are sales of products classified as principal to a different industry.

Conversely, 'carry-in' product sales are defined as sales of products classified as principal to an industry which are made by companies classified to other industries.

Therefore one industry's carry-out product sales are another's carry-in product sales and vice versa. For example, a firm classified as a footwear manufacturer may also manufacture luggage. The footwear industry therefore has carry-out sales to the luggage industry, and the luggage industry is carrying-in sales from the footwear industry.

What are 'Other' sales?

Where companies produce relatively very small amounts of certain products these are often grouped together in an 'Other' category to lessen the burden on companies responding to the survey. The category will include products with an annual sales value of less than £25,000 each. In the Sales and Turnover table these are added to the sales of products not listed in the individual product tables because of suppression, see below.

Industry Principal Products and Trade

This table summarises the total sales of the principal products for the industry, together with the total imports and exports. This table exists only for the value data as the volume units can differ between products and so aggregation would not be meaningful.

Derived data are also included in this table; the net balance of trade and the UK net supply for principal products of the industry.

Analysis in terms of exports as a percentage of PRODCOM ie UK manufacturers' sales, and imports as a percentage of UK net supply are also shown in this table.

What is the net balance of trade?

Exports data are subtracted from imports data to derive the net balance of trade for the principal products of an industry to the UK. Net balance of trade is also shown for each product in the individual product tables, see below.

Total exports data are subtracted from total imports data to derive the total trade balance of the products to the UK. Similarly the total trade balance is shown for each product in the individual product tables, see below.

What is UK net supply?

The net supply of principal products to the UK market is shown. This is calculated as PRODCOM, ie UK manufacturers' sales, less exports plus imports. This can take a negative value where there has been a re-export of imported goods or export of stockpiled goods from previous periods.

Individual Product Tables

The product tables contain the PRODCOM, imports and exports data for each individual product classified to that industry. The trade data is matched to the PRODCOM data for each product via the Combined Nomenclature (CN) coding system used for the collection of trade data at the product level.

The value and volume of sales is shown together with the average unit price (value divided by volume) and the derived net balance of trade and UK net supply.

The unit volume collected under PRODCOM is indicated in each product table. In general the volume is collected in weight (kilograms) to retain comparability with the imports and exports data collected by Customs and Excise. There are however a number of products where a different unit of volume is considered more appropriate. Volume data are not collected for a small number of products where it has proven difficult to obtain meaningful data.

What are aggregated products?

Some industries contain a small number of cases where data for several products are aggregated together. These are listed at the end of the Contents (where applicable) and are of two types:

- products aggregated together as trade data is only available at that level
- products split into new, more detailed product headings as trade associations have advised that the greater detail is more meaningful than the original grouping.

Suppression

Why are data suppressed?

Data are suppressed so that in no way can any individual UK firm's sales be disclosed unless they have given the ONS express permission to do so. Data also sometimes have to be suppressed to prevent disclosure of another piece of disclosive data by deduction.

Rounding of data

Due to the effects of rounding, totals and other calculated values may not always agree with those calculated from the individual components shown in the tables.

What symbols are used?

- S - suppressed as disclosive
- S* - suppressed but aggregated in the Industry Sales and Turnover table
- Q - data under investigation with HM Customs and Excise
- N/A - data not available
- * - not able to calculate data

INDUSTRY SALES AND TURNOVER

Medical & Surgical Equipment and Orthopaedic Appliances Industry 33100

This table shows the relationship between the total sales of principal products of the industry and the total turnover of the companies classified to the industry.

Companies are classified to an industry according to their main production activity (principal products). The total turnover of the companies is broken down into non-production activity, split into four main headings. Net Carry-In/Carry-Out and the Total UK Manufacturer Sales of products within the industry.

Carry-In sales are defined as the sales of products classified to an industry which are made by companies classified to other industries. Conversely, Carry-out sales are the sales of products classified to other industries by companies classified to the industry.

1 Data in this series does not contain suppressed data and, therefore, may not be comparable from period to period.

2 "Other" products are those with a sales value of less than twenty five thousand pounds each, which will not have been reported separately. This heading includes any data marked S*.

3 Carry-In (sales of products in this industry, but made by businesses classified to other industries) LESS Carry-Out (Sales of products classified to other industries, but made by businesses classified to this industry).

INDUSTRY PRINCIPAL PRODUCTS AND TRADE

Medical & Surgical Equipment and Orthopaedic Appliances Industry 33100

This table shows the total sales for all principal products for the industry. It includes data on total UK Manufacturer sales, imports exports and derived data for net supply to the UK market, home sales and home production.

The data are available in value terms only as the volume of different products sold can be measured in different units which cannot be aggregated meaningfully.
