PRODCOM

PRODCOM stands for PRODUcts of the European COMmunity and is a European Union (EU) wide survey of production mainly for the manufacturing industries and covers around 4,400 products classified to around 250 industries. Companies selected for PRODCOM supply value sales data for the products they manufacture, as well as non-manufacturing income. In addition companies in approximately three quarters of the covered industries supply volume sales data. All figures are now collected annually.

The reports contain data on the sales of UK based manufacturers of individual products covered by the PRODCOM inquiry, and most contain imports and exports data supplied by Customs & Excise (C&E). The data for each industry are shown in a series of three types of tables: Sales and Turnover, Principal Products and Trade and Individual Products. For further Information go to http://www.statistics.gov.uk/downloads/theme_commerce/PRODCOM_information.pdf

The sample design selects businesses by employment size and industry classification. Additional constraints are built into the sample design with a view to restricting the burden of form filling on smaller businesses. For further methodological information go to http://www.statistics.gov.uk/downloads/theme_commerce/PRODCOM_Methodological_note.pdf

Standard error estimates are also published for most product value estimates. For more information on standard error estimates go to http://www.statistics.gov.uk/downloads/theme_commerce/PRODCOM_Quality_Measures_Explanatory_Notes.pdf

INDUSTRY SALES AND TURNOVER**Builders' Carpentry and Joinery - Industry 20300**

This table shows the relationship between the total sales of principal products of the industry and the total turnover of the companies classified to the industry.

Companies are classified to an industry according to their main production activity (principal products). The total turnover of the companies is broken down into non-production activity, split into four main heading, Net Carry-In/Carry-Out and the Total UK Manufacturer Sales of products within this industry.

Carry-In sales are defined as the sales of products classified to an industry which are made by companies classified to other industries. Conversely, Carry-out sales are the sales of products classified to other industries by companies classified to this industry.
