About the Office for National Statistics

The Office for National Statistics (ONS) is the government
Agency responsible for compiling, analysing and
disseminating many of the United Kingdom's economic,
social and demo-graphic statistics, including the retail
prices index, trade figures and labour market data, as well
as the periodic census of the population and health
statistics. The Director of ONS is also the National
Statistician and the Registrar General for England and
Wales, and the agency administers the statutory
registration of births, marriages and deaths there.

A National Statistics publication

National Statistics are produced to high professional
standards set out in the National Statistics Code of
Practice. They undergo regular quality assurance reviews
to ensure that they meet customer needs. They are
produced free from any political interference.

Introduction

Quarter Four 2005

This Business Monitor presents a quarterly analysis of United Kingdom exports and imports of goods grouped according to the industries of which those goods are principal products. The industries are the classes of the 2003 Standard Industrial Classification (SIC(03)).

All data are shown on a seasonally adjusted Balance of Payments basis at current prices which provides a comprehensive set of SIC(03) trade in goods figures fully compatible with the National Statistics Balance of Payments and National Accounts outputs. This issue of the *MQ10* is consistent with the figures shown in the National Statistics First Release on UK Trade of 9 *March* 2006.

National Statistics Online Services

Free access to National Statistics data is available online at:

www.statistics.gov.uk

Time Series Data

Access to around 40,000 time series, of primarily macro-economic data, drawn from the main tables in a range of our major economic and labour market publications. Download complete releases, or view and download your own customised selection of individual time series.

StatBase®

Web-based access to time series, cross sectional data and metadata from across the Government Statistical Service (GSS), organised by theme and subject. Download many datasets, in whole or in part, or consult directory information for all GSS statistical resources, including censuses, surveys, periodicals and enquiry services. Information is posted as PDF electronic documents, or in XLS and CSV formats, compatible with most spreadsheet packages.

Complete copies of this publication are available to download free of charge on the following web page: (<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=613&image.x=15&image.y=8>).

Longer historical runs of the data in this publication can be downloaded free of charge from the National Statistics website (<http://www.statistics.gov.uk>). Links to *StatBase* (<http://www.statistics.gov.uk/statbase/mainmenu.asp>) and *Time Series Data* (<http://www.statistics.gov.uk/statbase/tsdintro.asp>) allow individual time series to be viewed and downloaded – more details can be found online.

Electronic versions of this data are also available from National Statistics, e-Communications, Zone DG/19, 1 Drummond Gate, London SW1V 2QQ . Telephone +44 (0)20 7533 5675, fax +44 (0)20 7533 5688, or email statbase@statistics.gov.uk.

Business Monitor MM24

Similar arrangements apply to editions of the *Monthly Review of External Trade Statistics*, which shows monthly trade in goods data analysed according to the Standard International Trade Classification (SITC, Rev.3).

Manufacture of flat glass	QBMT	26.11	49	51	58	13	13	12	13	14	13	15
Shaping and process of flat glass	QBMU	26.12	174	204	175	49	54	52	49	47	43	43
Manufacture of hollow glass	QBMV	26.13	120	121	101	30	30	29	32	26	29	25
Manufacture of glass fibres	QBMW	26.14	147	147	145	35	36	38	38	37	37	35
Manufacture of other glass including technical glasswares	QBMX	26.15	221	217	168	54	57	53	53	41	44	42
Manufacture of ceramic products	WJOV	Group 26.2	529	507	493	126	127	127	127	124	128	123
of ceramic household goods	QBMY	26.21	251	213	197	54	53	54	52	50	51	49
of ceramic sanitary fixtures	QBZ	26.22	37	44	48	10	10	12	12	12	12	12
of ceramic insulators etc	QBNA	26.23	20	19	20	4	5	4	6	4	6	5
of other technical ceramic goods	QBNA	26.24	10	19	17	4	6	4	5	5	5	3
of other ceramic products	QBNC	26.25	15	18	18	5	4	5	4	5	5	5
of refractory ceramic products	QBND	26.26	196	194	193	49	49	48	48	48	49	49
Manufacture of ceramic tiles and flags	WJOW	Group 26.3	16	17	18	4	4	5	4	5	4	5
Manufacture of ceramic tiles and flags	QBNE	26.30	16	17	18	4	4	5	4	5	4	5
Manufacture of bricks etc in baked clay	WJOX	Group 26.4	24	26	36	5	7	7	7	7	11	9
Manufacture of bricks etc in baked clay	QBNE	26.40	24	26	36	5	7	7	7	7	11	9
Manufacture of cement, lime and plaster	WJOY	Group 26.5	55	63	72	15	17	16	15	15	17	19
of cement	QBNG	26.51	36	40	48	10	11	10	9	10	11	13
of lime	QBNI	26.52	11	10	12	2	3	3	2	2	3	3
of plaster	QBNI	26.53	8	13	12	3	3	3	4	3	3	3
Manufacture of articles of concrete, plaster and cement	WJOZ	Group 26.6	150	159	166	41	39	39	40	38	43	43
of concrete goods for construction	QBNI	26.61	91	100	111	25	23	24	28	25	28	29
of plaster goods for construction	QBNI	26.62	12	18	17	4	5	5	4	4	5	4
of ready-mixed concrete	QBNI	26.63	7	8	13	2	2	2	2	3	4	3
of mortars	QBNI	26.64	—	—	—	—	—	—	—	—	—	—
of fibre cement	QBNI	26.65	22	15	10	5	4	4	2	3	3	2
of other articles of concrete etc	QBNO	26.66	18	18	15	5	5	4	4	3	3	5
Cutting, shaping and finishing of stone	WJPA	Group 26.7	18	21	27	5	5	5	6	5	8	5
Cutting, shaping and finishing of stone	QBNI	26.70	18	21	27	5	5	5	6	5	8	5
Manufacture of other non-metal mineral goods	WJPB	Group 26.8	380	430	505	105	100	109	116	125	125	129
of which												
Production of abrasive products	QBNI	26.81	118	116	120	31	27	30	28	32	28	31
Manufacture of non-metal mineral products nec	QBNI	26.82	262	314	385	74	73	79	88	93	97	98

Notes

1. The statistics of trade in goods compiled by the Office for National Statistics (ONS) are derived principally from data provided by the Statistics and Analysis of Trade Unit (SATU).

Overseas Trade Statistics compiled by SATU

2. Since 1993 statistics of the United Kingdom's overseas trade in goods comprise:

- statistics of UK imports from and exports to countries outside the EU which have been compiled from declarations made to HM Revenue & Customs (HMRC), previously Customs & Excise;
- statistics of UK arrivals (imports) from and dispatches (exports) to other Member States of the EU compiled from Intrastat returns sent to SATU.

The Intrastat system is linked to Value Added Tax (VAT) and has applied since 1993 in all EU member states. Prior to 1993, statistics of UK trade with *all* countries were compiled from declarations made to HM Customs & Excise.

3. For statistical purposes, the UK adopts the valuation bases recommended in the *International Merchandise Trade Statistics Concepts & Definitions* published by the United Nations. This means the valuation of exports (dispatches) is on a *free on board* (fob) basis, that is the cost of goods to the purchaser abroad, and the valuation of imports (arrivals) is on a *cost, insurance and freight* (cif) basis. This includes all expenses incurred moving the goods to the point of entry into the UK (but excludes any duty or tax chargeable in the UK).

Balance of Payments Statistics compiled by ONS

4. To conform to the International Monetary Fund (IMF) Balance of Payments (BoP) definition, the value of imports required is the value of goods at the point of export (that is, the Customs border of the exporting country) rather than the value of goods as they arrive in the UK. The freight and insurance costs of transporting the goods to the UK needs to be deducted from the values recorded by SATU.

5. In addition, ONS has to make various other adjustments to include transactions which are not reported to SATU and to exclude transactions reported to SATU but where there is no change of ownership. Table 2.4 in the annual National Statistics publication *United Kingdom Balance of Payments* summarises the transition from trade in goods statistics on an Overseas Trade Statistics (OTS) basis (compiled by SATU) to a BoP basis (compiled by ONS) for each of the last 11 years.

6. Following a change in the pattern of trading associated with Missing Trader Intra-Community (MTIC) fraud, identified by HMRC, interpretation of the breakdown between EU and non-EU trade is more difficult. Some VAT MTIC fraud is currently affecting non-EU exports. However, the MTIC trade adjustments are added to the EU import estimates derived from Intrastat returns as it is this part of the chain that is not recorded. Changes to the pattern of MTIC can therefore make it difficult to analyse trade by commodity group and by country as increases inflate both imports and exports. In particular, adjustments affect trade in capital goods and intermediate goods - these categories include mobile phones and computer components.transactions reported.

Classifications and definitions

7. These tables are now based on (SIC(03)). The only changes between (SIC(92)) and (SIC(03)) are:-

<u>Old</u>		<u>New</u>
27.35	- is now part of -	27.10
29.40	- split into -	29.41, 29.42 & 29.43
40.10	- split into -	40.11, 40.12 & 40.13
40.20	- split into -	40.21 & 40.22.

The Harmonised Commodity Description and Coding System allocates article and product codes to the industry which, in the main, produces it. Where more than one industry is likely to be responsible for a commodity in which trade is of a significant value, a proportion of that value is allocated to each. The 2003 Standard Industrial Classification (SIC(03)) is available electronically on the National Statistics website at <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=14012>.

8. Not all exports allocated to an industry were necessarily produced in establishments classified to that industry. However, the exports attributed to an industry are broadly comparable with sales figures for principal products of that industry. Imports refer to the industry by which the commodity was produced rather than by the importing industry.

Seasonal Adjustment

9. The quarterly trade in goods figures published by National Statistics are on a seasonally adjusted basis. The seasonally adjusted series for total trade in goods are derived by summing or weighting together major commodity components. In common with other parts of National Statistics, the seasonal adjustment package used is X12ARIMA developed by Stats Canada.

10. The introduction of the New Export System for non-EU exports has led to greater efficiency; improving processing and thereby speeding up the flow of information but led to a change in the seasonal pattern. Three years of data are needed to estimate the new seasonal factors with confidence. In the meantime, the quality of the seasonal adjustment is the best that can be constructed from the available data. However, it is more uncertain than usual and the seasonally adjusted series is particularly prone to revision when further observations become known.

Revisions

11. Trade in goods figures are revised from time to time to take in adjustments to the OTS data and changes in the seasonal adjustment factors. Because of the Intrastat system, there is a need to revise the EU estimates over a longer period of time. Most revisions are small in relation to the variability of the series.

Rounding

12. Figures on a Balance of Payments basis are adjusted to ensure arithmetical consistency, in line with conventions used in the National Accounts.

Related data

13. Equivalent information at constant prices is available from National Statistics Online Services Branch (see the title page of this publication). Online Services Branch can also supply comparable information for UK trade with EU and Non-EU countries, as well as the entire range of SIC(92) data on an Overseas Trade Statistics basis, not seasonally adjusted.

Further information

14. A paper entitled *Statistics on Trade in Goods* (GSS Methodological Series No. 10) gives comprehensive explanations of the bases on which trade in goods statistics are compiled, available on the National Statistics website at <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=3134>.
