Notes to the Index

- 1 The A to Z subject index covers the whole of the journal apart from the tables which are in standard form each month. It therefore includes references not only to main features but also to news reports.
- 2 *Labour Market Trends* replaced *Employment Gazette* in November 1995 when the Central Statistics Office (CSO) took over from the Department of Employment responsibility for publishing statistics on the labour market. In April 1996 the CSO merged with the Office of Population Censuses and Surveys to form the Office for National Statistics (ONS).

Labour Market Trends is available to download free of charge from the National Statistics website.
