

2006-based Subnational Population Projections

Please click on the table title to link to an Excel file:

1: GORs (Government Office Regions); 2006-2031 population projections by sex and quinary age

2: LAs and counties in NW, NE and Y&H GORs; 2006-2031 population projections by sex and quinary age

3: LAs and counties in EM, WM and East GORs; 2006-2031 population projections by sex and quinary age

4: LAs and counties in SE, SW and London GORs; 2006-2031 population projections by sex and quinary age

5: All LAs, counties and GORs; 2006-2031 population projections by sex and quinary age

6: All LAs, counties and GORs; natural change and migration summaries 2007-11, 2016, 2021, 2026, 2031 for population projections components of change

7: PCOs and SHAs; 2006-2031 population projections by sex and quinary age

A Table 8 was originally planned but has not been produced

9: All LAs; 2006-2031 population projections for children, working age and pension age including old age dependency ratios

31 July 2009

Correction Notice

Production errors in Table 9 of the 2006-based Subnational Population Projections (SNPP) for England have been corrected since it was originally published on 12 June 2008. These errors were due to:

1. a data sorting problem
2. incorrect formulae used in the calculation of the old age dependency ratios.

These errors have now been corrected. ONS apologises for any inconvenience caused.
