

National Travel Survey Quality Review 2000

This is the first review to be completed under the NS 'Transport, Travel and Tourism' theme.

Following wide consultation with users and a methodology review, the NTS was found to be good quality and fit for its purpose of monitoring trends in personal travel.

Some changes will be made to the survey, of which the most significant is a major increase in the annual sample size to 15,000 households from 2002.
