

18 December 2007

Business investment Revised results – 3rd quarter 2007

These data were scheduled for release on 19 December 2007. ONS became aware on 18 December that some of the data series had inadvertently been published on the Time Series Data section of the National Statistics website. A decision to publish the full release ahead of schedule was therefore taken by the National Statistician.

ONS apologises for any inconvenience caused.

Business investment Revised results – 3rd quarter 2007

Business investment, measured in chained volume terms seasonally adjusted (CVMSA), for the third quarter of 2007 was estimated to have risen by 2.0 per cent from the previous quarter and was 6.6 per cent higher than the third quarter of 2006. The third quarter figure was £35,639 million.

The revised estimate of business investment (CVMSA) by private and public sector manufacturing for the third quarter is estimated to have risen by 1.1 per cent since the previous quarter and by 5.0 per cent since the third quarter of 2006. The third quarter figure was £3,816 million.

Estimates of third quarter private sector business investment (CVMSA) show that services rose by 1.3 per cent, while construction and other production has risen by 5.0 per cent since the previous quarter. Compared with the third quarter of 2006, services rose by 6.1 per cent while construction and other production is estimated to have risen by 13.0 per cent. The latest quarterly figures were £4,961 million for construction and other production and £25,892 million for services.

Next publication date
26 February 2008

The revised estimate of business investment (CVMSA) by non-manufacturing public corporations is estimated to have risen by 9.0 per cent since the previous quarter and to have fallen by 2.3 per cent since the third quarter of 2006. The third quarter figure was £970 million.

More detailed figures, including estimates of business investment at current prices and measured in chain volume terms for seasonally and non seasonally adjusted are shown in Tables 1 to 7, followed by Table R, which shows revisions.

The estimates now include improved measurement of own-account computer software, which is explained more fully in section 10 of the background notes.

Revisions

In line with normal practice for national accounts at this point in the year, revisions have been taken on back to the first quarter of 2006.

Table R shows the latest and previously published volume growth rates for all quarters back to 2004q4. The business investment components were previously published on 22 November 2007.

Business investment growth for the third quarter of 2007 has been revised up to 2.0 per cent from 0.0 per cent previously published. Compared with the same quarter a year ago, total business investment for the third quarter of 2007 has been revised up to 6.6 per cent from 4.6 per cent previously published.

Total non-manufacturing growth for the third quarter of 2007 has been revised up to show growth of 2.1 per cent from 0.0 per cent previously published. The main drivers were upward revisions in other services, up to growth of 2.3 per cent from 0.3 per cent previously published, and construction, up to growth of 12.7 per cent from 6.3 per cent previously published. There were also revisions to industries classified within public corporations non-manufacturing to show growth of 9.0 per cent from 6.9 per cent previously published.

Increased capital expenditure within other services was due to industries within real estate and renting business services, financial intermediation, transport and communications and other service activities.

Total manufacturing growth for the third quarter of 2007 has been revised up to 1.1 per cent from 0.1 per cent previously published. Compared with the same quarter a year ago, total manufacturing for the third quarter of 2007 has been revised up to 5.0 per cent from 0.4 per cent previously published. This

is driven by upward revisions to private sector manufacturing investment within industries classified in metal and metal goods, food, drink and tobacco, solid and nuclear fuels, oil refining and other manufacturing. These were partly offset with decreases in textiles, clothing, leather and footwear industries, engineering and vehicles industries and chemicals and man made fibres industries.

By asset, this reflects upward revisions to private sector manufacturing for new building works.

The annual growth of total business investment for 2006 had been revised down to a fall of 4.7 per cent from a fall of 4.3 per cent previously published. This reflects reduced capital expenditure for industries within public corporations manufacturing and private sector for other services industries within real estate, renting and business services.

Investment in computer software and hardware

The Office for National Statistics collects information on computer software acquisitions and computer hardware acquisitions and disposals separately from other capital equipment. These data, first collected separately at the beginning of 2001, are presented below. Only the private sector is covered and the estimates are based on the information reported to us in the quarterly capital expenditure inquiry.

This data is collected in recognition of the increasing importance of this category of investment and to meet the national and international user interest in this area. ONS does not seasonally adjust these data, or measure them in chained volume terms, as the short length of the time series might affect the quality of such outputs.

The methodological improvements for own account software that have been incorporated in this release do not extend to hardware and purchased software. As a result, these separate estimates for software and hardware will continue to be published within this release.

Acquisition of computer software

Includes all expenditure on computer software to be used for more than one year. This includes the purchase or development of large databases and license payments for the use of software. Software produced for own use should be valued at production cost and included only if its useful life is at least one year. If software and hardware are purchased together and the components cannot be separated, then the purchase is recorded as hardware.

Computer software investment (acquisition) by industry¹

2007 Q2 ²	139	20	46	238	980	1284	1423
2007 Q3 ²	155	48	42	263	1117	1470	1625

1. Data summarised in the table refers only to private sector data as collected through the quarterly capital expenditure inquiry.

2. Revised figures.

The tables summarise the data collected. It is important to note that these are early data. Data from a longer period will be required before the quality can be fully assessed and the implications of these data can be judged.

The estimate of total computer software investment by the private sector, at current prices not seasonally adjusted (CPNSA), for the third quarter of 2007 was £1,400 million. The estimate of total computer hardware acquisitions less disposals by the private sector, at current prices not seasonally adjusted (CPNSA), for the third quarter of 2007 was £1,625 million. The estimates suggest that for the third quarter of 2007 about 8¾ per cent of private sector business investment was on computer software and hardware – about 4 per cent on software and 4¾ per cent on hardware. Investment in computer software and hardware in the manufacturing sector was about 8½ per cent of total investment, and 9¾ per cent of total investment in the service sector.

BACKGROUND NOTES

1. Industries are sampled on the basis of the Standard Industrial Classification 2003 (SIC 03). The sectors cover the following divisions:

Other

Production - divisions 01 to 14 & 40 to 41

Manufacturing - divisions 15 to 37

Construction - division 45

Services

(Distribution) - divisions 50 to 52

Services

(Other) - divisions 55 to 93

2. The reference year for all chained volume measures is 2003.
3. The figures cover acquisitions less disposals of vehicles and of other capital equipment together with expenditure on leased assets and new building work. Spending on land and existing buildings is excluded.
4. The private sector estimates exclude expenditure on dwellings.

Revisions

5. In line with the revision policy used for national accounts this month, this publication shows quarterly and annual revisions from 2006q1 onwards.
6. In April 2005 nuclear reactors were transferred from British Nuclear Fuels plc (BNFL) to the Nuclear Decommissioning Authority (NDA). BNFL is classified as a public corporation in National Accounts and the NDA as a central government body. The capital formation estimates in this release reflect this transfer via the public corporation manufacturing. A more detailed explanation about the transfer can be found in the December 2006 Business Investment Release. This can be found at: <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=171&Pos=&ColRank=1&Rank=422>
7. Investment in the railway industry by the infrastructure company Network Rail is in the public corporations (non-manufacturing) series for the fourth quarter of 2002 and the first quarter of 2003 and the private sector services series for all subsequent quarters. More information about the classification of this company can be found via this link: http://www.statistics.gov.uk/about/Methodology_by_theme/rail_network/default.asp
8. One indication of the reliability of the key indicators in this release can be obtained by monitoring the size of revisions. The tables below record the size and pattern of revisions, which have occurred over the last five years. Please note that these indicators only report summary measures for revisions. The revised data may itself, be subject to sampling or

other sources of error. A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (*) shows if the test is significant. Details about this revisions material can be found at:

<http://www.statistics.gov.uk/cci/article.asp?ID=793>

A more detailed analysis of GDP and its components, including GFCF was published on 13 December 2005 within Economic Trends. This material can be found at:

<http://www.statistics.gov.uk/cci/article.asp?ID=1289>

9. Table 1 below shows the revisions between the provisional and revised estimates of growth in total business investment and total manufacturing investment. These are the estimates published towards the end of the second and third months respectively, after the end of the quarter. These are called the month 2 and month 3 estimates in the material below. The analysis of revisions between month 2 and month 3 uses estimates published from November 2002 (for 2002 q3) to September 2007 (for 2007 q2).

Table 1: Revisions to month 2 estimates of business investment and total manufacturing investment growth.

	Growth in latest period (per cent)	Revisions between month 2 and month 3 estimates of business investment and total manufacturing investment growth (quarterly, CVMSA)	
		Average over the last five years	Average over the last five years without regard to sign (average absolute revision)
Total business investment	2.0	0.61*	0.79*
Total manufacturing	1.1	1.96*	3.34*

* Statistical tests produced evidence that the mean revision is significantly different from zero.

Table 2 below shows the revisions between the month 3 estimates of growth in business investment and total manufacturing investment and the equivalent estimates published three years later. The table covers revised estimates of business investment and total manufacturing investment first published from November 1999 (for 1999 q3) to September 2004 (for 2004 q2).

Table 2: Revisions to month 3 estimates of growth in business investment and total manufacturing investment

	Growth in latest period (per cent)	Revisions between the first month 3 publication and estimates three years later	
		Average over the last five years	Average over the last five years without regard to sign (average absolute revision)
Total business investment growth (quarterly, CVMSA)	2.0	0.17	2.41
Total manufacturing investment growth (quarterly, CVMSA)	1.1	0.49	3.79

Statistical tests produced no evidence that the mean revision is significantly different from zero.

Spreadsheets giving revisions triangles (real time databases) of estimates for 1996q1 to 2007q2, and the calculations behind the averages in both tables are available on the National Statistics website at: <http://www.statistics.gov.uk/Statbase/Product.asp?vlnk=171>

Own-account software

10. A summary of the main findings of the OECD task force on computer software is presented in Ahmad (2003: Measuring investment in software, STI Working paper, OECD). The ONS's implementation of this method is described by Chamberlin, Clayton and Farooqui (May 2007: New measures of UK private sector software investment). http://www.statistics.gov.uk/elmr/05_07/downloads/ELMR_0507Chamberlin_Clayton_Farooqui.pdf

The new methodology is a supply-side approach whereby investment in own-account software is measured using the costs of production. This previous method was based on an historic demand-side survey, updated using assumptions about labour input, by sector. It was recognised, however, that these estimates were likely to understate the activity actually taking place.

Further information

11. The next business investment release will be on 26 February 2008. This release will contain no revisions to back data.
12. Complete runs of series in this Release are available to download free of charge at <http://www.statistics.gov.uk/timeseries>

Alternatively, for tailored data call Online Services on 020 7533 5675 or email tailored@statistics.gov.uk

13. Details of the policy governing the release of new data are available from the press office. Also available is a list of those given pre-publication access to the contents of this release.
14. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown copyright 2007.
