Consumer price indices January 2006

In the year to January, the consumer prices index (CPI) rose by 1.9 per cent, unchanged from December.

In the year to January, the all items retail prices index (RPI) rose by 2.4 per cent, up from 2.2 per cent in December.

Over the same period, the all items RPI excluding mortgage interest payments (RPIX) rose by 2.3 per cent, up from 2.0 per cent in December.

CPI, RPI and RPIX 12-month percentage changes

2006	Jan	100.5	1.9	193.4	2.4	189.4	2.3

Note: the CPI percentage changes over 12 months are calculated from unrounded levels which are available on request. This and rebasing of the CPI, which came into effect this month, has resulted in a number of revisions to rates of change, including the all items 12-month rate for December 2005 which has been revised down from 2.0 per cent to 1.9 per cent.

Main contributions to the change in the 12-month rate¹

CPI

The largest upward effect on the CPI annual rate came from transport, due to large upward contributions from:

- Fuels and lubricants due to price changes for ultra-low sulphur petrol and diesel. This year, the average price for a litre of ultra-low sulphur petrol rose by 1.7p per litre to 88.8p. Last year prices fell by around 3p per litre; and
- Passenger transport by air where air fares fell by less than last year. Following a smaller than usual increase in fares in December, fares on international routes fell back to close to their November levels.

There was also a small upward effect from sea travel with fares rising slightly this year but falling a year ago, particularly on international crossings.

A further large upward effect came from communication due to changes in the cost of fixed landline telephone charges this year.

The largest downward effect on the CPI annual rate came from furniture, household equipment and routine maintenance due to a large downward contribution from furniture and furnishings. The effect of prices falling by more than a year ago, due to sales across a range of items, is amplified by an increase in the weight of this component in 2006.

There was also a large downward effect from miscellaneous goods and services with large downward contributions from financial services, where last year's increases in overdraft fees were not repeated this year, and from other services not elsewhere classified, with costs rising by less than a year ago. A partially offsetting small upward effect came from price changes for appliances and products for personal care.

Other large downward contributions came from:

- Recreation and culture, in particular games, toys and hobbies reflecting changes in the price of children's toys and computer games. Other small downward contributions came from changes in the cost of cultural services, package holidays and major durables for outdoor recreation. A large partially offsetting upward effect came from recording media, mainly due to changes in the price of pre-recorded CDs, DVDs and videos;
- Food, in particular vegetables, where downward contributions from lettuces, sprouts and cauliflowers were partially offset by upward contributions from onions and cucumbers; and
- Clothing and footwear with prices of women's and children's outerwear and other clothing falling by more than a year ago reflecting more widespread sales and cheaper replacement stock. A partially offsetting upward effect came from men's clothing.

Transport
CPI percentage changes over 12 months

Furniture, household equipment etc.
CPI percentage changes over 12 months

Miscellaneous goods and services
CPI percentage changes over 12 months

¹ The CPI and RPI use different classification systems. Background Note 19 shows how, for each of the two indices, the main categories contributing to changes in the 12-month rate relate to each other

RPI

The largest upward effect on the RPI annual rate came from motoring expenditure, due to petrol and oil, as average pump prices for ultra-low sulphur petrol and diesel rose this year but fell last year. Another large upward contribution came from fares and other travel costs. This was mainly due to air fares falling by less than a year ago.

There were also small upward contributions from:

- Leisure goods, mainly due to prices of CDs and tapes rising this year but falling a year ago; and
- Housing, with charges for DIY materials and dwelling insurance and ground rent rising this year but falling last year.

The largest downward effect on the RPI annual rate came from leisure services. The cost of entertainment and other recreation, particularly theatre and museum admissions and live music, fell this year but rose a year ago. There was also a small downward effect from foreign holidays, mainly due to changes in the cost of late booked holidays and travel insurance.

Further large downward contributions came from household goods, with furniture prices falling by more than a year ago, and from food, mainly due to changes in the price of fresh vegetables.

Small downward contributions came from clothing and footwear, mainly due to women's outerwear, where prices fell by more than in the previous year, and tobacco, where prices were little changed this year but rose a year ago.

Motoring Expenditure
RPI percentage changes over 12 months

Fares and other travel costs
RPI percentage changes over 12 months

Leisure services

CPI main contributions¹ to the change in the all items 12-month rate between December 2005 and January 2006 (Unchanged).

CPI comparison of the 12-month percentage changes

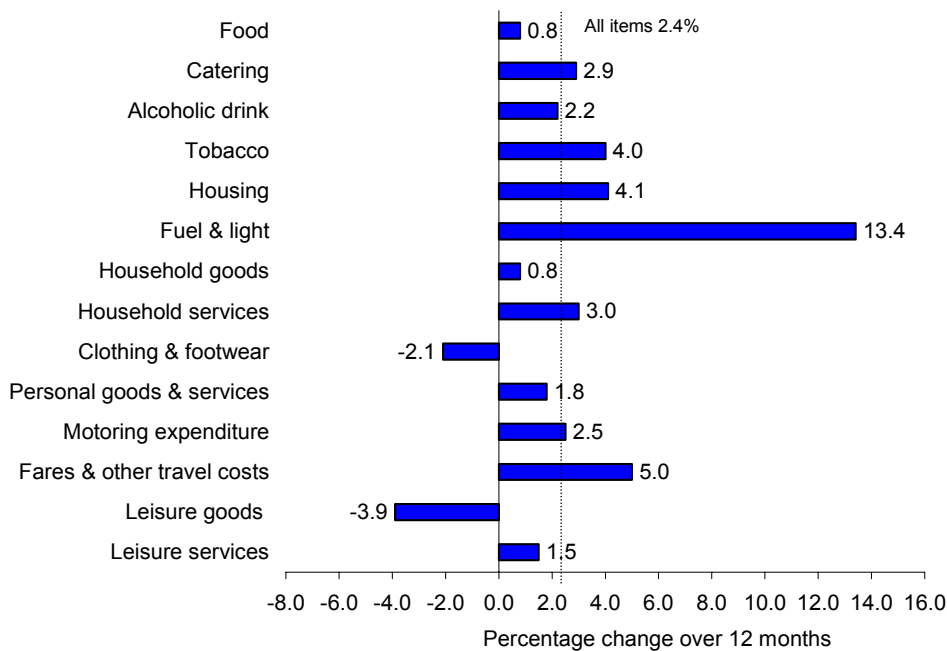

¹ Individual contributions to the change in the 12-month rate may not sum to the total due to rounding.

RPI main contributions¹ to the change in the all items 12-month rate between December 2005 and January 2006 (0.2 percentage points).

RPI comparison of 12-month percentage changes

¹ Individual contributions to the change in the 12-month rate may not sum to the total due to rounding.

BACKGROUND NOTES

UK consumer price indices

1. The consumer prices index (CPI) is the main United Kingdom domestic measure of inflation for macroeconomic purposes. The uses of the retail prices index (RPI) include indexation of pensions, state benefits and index-linked gilts. Both measure the average change from month to month in the prices of consumer goods and services purchased in the UK, although there are differences in coverage and methodology. A detailed description of these differences is given in the paper entitled "*The New Inflation Target: the Statistical Perspective*". This paper is available on the National Statistics website:
www.statistics.gov.uk/StatBase/Product.asp?vlnk=10913 The differences are also summarised below in note 12. Prior to 10 December 2003, the CPI was published in the UK as the harmonised index of consumer prices (HICP).
2. Both the CPI and the RPI are compiled each month using the same underlying price data, based on a large and representative selection of around 650 individual goods and services for which price movements are measured in around 150 areas throughout the UK. Around 120,000 separate price quotations are used every month to compile the indices.
3. Detailed figures for the CPI and RPI can be found in *Focus on Consumer Price Indices* on the National Statistics website, together with this First Release and additional briefing notes on the latest published figures. Further information is available from the contact numbers on the front page of this release.
4. The CPI and RPI can be thought of as measuring the monthly cost of a very large shopping basket comprising all the different kinds of goods and services bought by consumers in the UK. As the prices of individual items in the basket vary over time, the total cost of the basket will change. The spending patterns on which the CPI and RPI are based are reviewed annually. Details of the items included in the CPI and RPI baskets in 2005 are available from the National Statistics website: www.statistics.gov.uk/cci/article.asp?ID=1059 The expenditure weights used to compile the indices are also updated each year. Details of the weights for 2005 are available from the National Statistics website: www.statistics.gov.uk/cci/article.asp?ID=1112
5. A full description of the methodology used to construct the CPI and RPI is given in the *Consumer Price Indices Technical Manual 2005 edition*, which is available from the National Statistics website:
www.statistics.gov.uk/statbase/Product.asp?vlnk=2328

Rebasing

6. All published Consumer Prices Index (CPI) levels, including back series, have been rebased to 2005=100 with effect from 14 February 2006. The rebased series replace the previous series, based on 1996=100, as the official CPI series. All series based on 1996=100 have been discontinued but are available from Time Series Data on the National Statistics website.

7. ONS has taken the opportunity of the CPI re-basing exercise to standardise procedures for the calculation of rates of change from index numbers. Rates of change for the CPI will in future be calculated from unrounded index levels, rather than on the published indices, which are rounded to one decimal point. The use of unrounded indices will increase the accuracy of the calculation and has now become standard ONS practice. This change has come into effect with re-basing and has been applied retrospectively. Note that this is a change of practice compared with what had previously been announced which said that rates of change would be based on rounded indices. Revisions to historic data are solely due to rebasing and the use of unrounded indices to derive rates of change. The unrounded index levels are available on request.
8. A spreadsheet available at http://www.statistics.gov.uk/downloads/theme_economy/rebasing_2005.xls shows how the new series identifiers for the rebased index levels, and the one-month and 12-month rates of change, correspond with the previous set of identifiers based on 1996=100. The change of reference period does not apply to the Retail Prices Index, which will remain unchanged. The revised procedure for calculating inflation rates does not apply to the RPI which will continue to be calculated from rounded indices.

Revisions

9. Once the RPI indices are published they are never revised. CPI indices are revisable and, following the rebasing on to 2005=100, and the move to using unrounded numbers in the calculation of growth rates, there has been a number of revisions to published one-month and 12-month rates. Revisions to the all items CPI 12-month rate do not exceed +/-0.1 percentage points in any month: in the last 12 months, the only revisions have been to the February 2005 data where the 12-month rate has been revised up from 1.6 per cent to 1.7 per cent and the December 2005 figure which has been revised down from 2.0 per cent to 1.9 per cent.

Updating of weights and progress on research

10. In line with usual practice, the published COICOP class weights used to compile the CPI have been updated with effect from the January 2006 index. They are shown in Table 3. The weights for the unpublished detailed indices used in the CPI will be updated with the February 2006 index, at the same time as the RPI weights (both published and unpublished) are updated. There will also be changes to the selection of goods and services priced in both indices to reflect recent trends in household purchasing patterns. These will be described in an article to be published on the National Statistics website on Monday 20 March 2006.
11. Progress on a number of research areas is reported in a separate article, available on the National Statistics website:
www.statistics.gov.uk/cci/article.asp?ID=1399 from 13 February 2006.

Introduction of new Indices CPIY and CPI-CT

12. Two new indices based on the CPI will be published for the first time in next month's First Release. These indices provide different ways of examining the

impact of indirect taxes on the CPI. CPI excluding indirect taxes (CPIY) follows a similar methodology to RPIY. CPI at constant taxes (CPI-CT) holds taxes constant at the rate prevailing in the base period; when compared against the CPI one-month or 12-month rate of change it shows directly the impact of changes in indirect tax rates. Six CPI-CT component sub-indices will also be published. An article providing more information about these new series will be available to download from the National Statistics website from Tuesday 21 March 2006.

The consumer prices index (Tables 1 to 6)

13. The Chancellor of the Exchequer, in his Pre-Budget Report statement on 10 December 2003, said that with immediate effect the inflation target for the United Kingdom will be defined in terms of the CPI measure of inflation. The inflation target is specified as a 2 per cent increase for the 12-month rate of change in the CPI. Further details are available at: www.hm-treasury.gov.uk
14. Tables 5 and 6 provide a more detailed analysis of the goods and services components of the CPI, as well as special aggregate indices and related measures of the all items CPI excluding various components. An article providing more information about these series is available to download from the National Statistics website: www.statistics.gov.uk/cci/article.asp?ID=1060

The harmonised index of consumer prices (Table 7)

15. HICPs are calculated in each Member State of the European Union, according to rules specified in a series of European Regulations developed by the EU statistical office in conjunction with the EU Member States. In the UK, the HICP is known as the CPI, but the two remain one and the same index.
16. HICPs are used to compare inflation rates across the European Union. Since January 1999 it has also been used by the European Central Bank (ECB) as the measure of price stability across the euro area. Further details are available from the National Statistics website, www.statistics.gov.uk/hicp, and in an ECB Press Notice of 13 October 1998, *A stability-oriented monetary policy strategy for the European System of Central Banks*, available at: www.ecb.int/press/html/index.en.html

The retail prices index (Tables 1, 8 and 9)

17. The RPI is the most familiar general purpose measure of inflation in the United Kingdom and is continuously available from June 1947. Further details are available from the National Statistics website: www.statistics.gov.uk/rpi.
18. The RPI is used for a variety of purposes including the indexation of various incomes and prices. The Chancellor of the Exchequer, in his Pre-Budget Report statement on 10 December 2003, confirmed that uprating of pensions, benefits and index-linked gilts will continue to be calculated with reference to the RPI or its derivatives.

Differences between the CPI and the RPI (Table 10)

19. While the methodology of the CPI is similar to the RPI, it differs in the following ways:

- In the CPI, the geometric mean is used to combine the individual prices at the most basic level whereas the RPI uses arithmetic means.
- The CPI excludes a number of RPI series mainly relating to housing costs (for example, council tax), and in particular to owner occupiers' housing costs (including mortgage interest payments, house depreciation, and buildings insurance).
- The CPI includes series for university accommodation fees, foreign students' university tuition fees, and unit trust and stockbrokers charges, none of which are included in the RPI.
- Coverage of the CPI is based on the international classification system, COICOP (classification of individual consumption by purpose). The way in which this maps to the RPI groupings is shown in the table on the following page :

COICOP Divisions	RPI Groups
01 Food & non-alcoholic beverages	Food
02 Alcohol & tobacco	Alcoholic drink (off sales) Tobacco
03 Clothing & footwear	Clothing & footwear
04 Housing & household services	Housing (exc. MIPs, depreciation, council tax & building insurance) Fuel & light
05 Furniture & household goods	Household goods Domestic services
06 Health	Personal goods & services (health-related items)
07 Transport	Motoring expenditure Fares & other travel costs
08 Communication	Household services (exc. domestic services & fees and subscriptions)
09 Recreation & culture	Leisure goods Leisure services
10 Education	Fees & subscriptions (education-related items)
11 Restaurants & hotels	Catering Alcoholic drink (on sales)
12 Miscellaneous goods & services	Personal goods & services (non health-related items) Fees & subscriptions (non education-related items)

- The index for the purchase of new cars in the CPI is quality adjusted and based on actual published prices for new cars, whereas in the RPI new car prices are imputed from movements in second hand car prices.

- The CPI weights are based on expenditure by all private households, foreign visitors to the UK and residents of institutional households. In the RPI, weights are based on expenditure by private households only, excluding the highest income households and pensioner households mainly dependent on state benefits.
 - In the construction of the CPI weights, amounts paid out in insurance claims are distributed among the COICOP headings according to the nature of the claims' expenditure, with the residual (the service charge) being allocated to the relevant insurance heading. For the RPI weights, total expenditure (that is, gross of claims paid out) is assigned to the relevant insurance heading.
20. A breakdown of the difference between the CPI and RPI annual rates of inflation is shown in Table 10. There have been revisions to the series showing the difference in the rounded annual rates for CPI compared with RPI but not for other series in this table.
21. The coverage of the CPI was extended in stages with effect from the January 2000, 2001, and 2002 indices, and CPI methodology has also evolved since its launch. Details of these extensions can be found in a series of Economic Trends articles available from the National Statistics website:
www.statistics.gov.uk/cpi

Publication dates

22. Future publication dates are 21 March, 20 April, 16 May, 13 June, 18 July and 15 August. The European Commission will release HICP figures for the month of January 2006 for EU Member States, together with an EU average, on 28 February.

General

23. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to contents of this release.
24. In line with Consumer Price Indices Pre-Release arrangements, an advance estimate of the CPI was provided to the Governor of the Bank of England 3½ working days ahead of publication. The Governor shared this information with the MPC and officials present at the MPC policy meeting, on Thursday 9 February.
25. Complete runs of series in this release are available to download free of charge at: www.statistics.gov.uk/timeseries Alternatively, for low-cost tailored data call Online Services on 020 7533 5675 or email: tailored@statistics.gov.uk
26. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown Copyright 2006

Key: - zero or negligible

1 Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends No. 541 December 1998*. These details are also available on the National Statistics website: www.statistics.gov.uk/cpi/article.asp?ID=31

2 The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi)

Key: - zero or negligible

2 The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001. Details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi

1 For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/cci/article.asp?id=1060

3 For further information on all of these services components, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/ccj/article.asp?id=1060

1 Comprises 'Electricity, gas and other fuels' (group 04.5) and 'Fuels and lubricants' (class 07.2.2).

2 Comprises all other goods elements of the CPI. For further information, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/ccj/article.asp?id=1060

† Date of earliest revision † Estimated

1 Published as the CPI in the UK.(UK 2005=100,others 1996=100)

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004 and 25 member states from May 2004, the new member states being integrated using a chain index formula.

The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia with effect from 1 May 2004.

4 The coverage of the Monetary Union Area index was extended to include Greece with effect from Jan 2001.

Key: - zero or negligible

Index date for JANUARY: 17 January 2006

1 Consumer durables: Furniture, furnishings, electrical appliances and other household equipment, men's, women's and children's outerwear, footwear, audio-visual equipment, CDs and tapes, toys, photographic and sports goods.

2 The taxes excluded are council tax, VAT, duties, vehicle excise duty, insurance tax and air passenger duty. There are no weights available for RPIY.

3 This series has been constructed using the index for all items excluding mortgage interest payments prior to February 1995.

1 The differences due to housing, coverage and formula effect are all calculated independently and are not additive.

Source: National Statistics

2 Difference due to use of different formulae to aggregate prices at the most basic level.

3 This difference is derived as a residual.
