Consumer price indices April 2008

In the year to April, the consumer prices index (CPI) rose by 3.0 per cent, up from 2.5 per cent in March.

In the year to April, the all items retail prices index (RPI) rose by 4.2 per cent, up from 3.8 per cent in March.

Over the same period, the all items RPI excluding mortgage interest payments index (RPIX) rose by 4.0 per cent, up from 3.5 per cent in March.

	Consumer prices index (CPI)		All items retail prices index (RPI)		All items RPI excluding mortgage interest payments (RPIX)	
	Index (2005 =100)	Per cent change over 12 months	Index (Jan 1987 =100)	Per cent change over 12 months	Index (Jan 1987 =100)	Per cent change over 12 months
2007 Nov	105.6	2.1	209.7	4.3	202.4	3.2
Dec	106.2	2.1	210.9	4.0	203.5	3.1
Jan	105.5	2.2	209.8	4.1	202.7	3.4
2008 Feb	106.3	2.5	211.4	4.1	204.3	3.7
Mar	106.7	2.5	212.1	3.8	205.3	3.5
Apr	107.6	3.0	214.0	4.2	207.2	4.0

Main contributions to the change in the 12-month rate¹

CPI

The largest upward contribution to the change in the CPI annual rate came from housing, water, electricity, gas and other fuels. Average gas and electricity bills increased this year but decreased last year and the price of heating oil rose by more than a year ago.

There were further large upward contributions from:

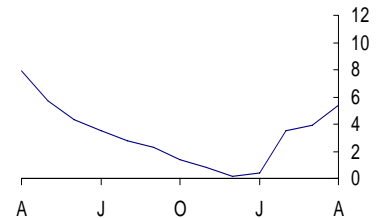

- Food and non-alcoholic beverages where overall prices rose by more than last year. There was an upward effect from meat, fruit, some breads and cereals and fish
- Miscellaneous goods and services which rose in price this year and fell last year. The effect came mainly from banking services where foreign exchange commission rates rose this year but fell last year, and mortgage arrangement fees increased
- Restaurants and hotels where prices rose this year by more than last year. The effect mainly comes from alcoholic drinks sold in restaurants and cafes and incorporates the increase in excise duty which was larger than last year
- Alcohol and tobacco where spirits and wine prices rose this year but fell last year and beer rose by more than last year. The main effect is due to the increase in excise duty which was larger than last year
- Recreation and culture where the largest effect came from computer games which rose this year but fell last year. There were small upward effects from personal computers and foreign holidays. There was a small offsetting effect from cultural services
- Furniture and household goods. This was mainly due to furniture and furnishings where price reductions in April had less effect than in the previous year, across a wide range of furniture

There was a small upward contribution from communication where, overall, cable and mobile phone charges were broadly unchanged this year compared with a fall in price last year

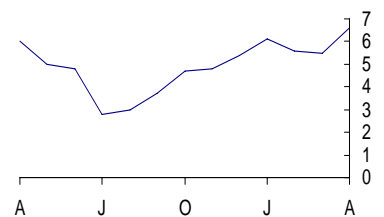

The largest downward contribution came from transport costs. This was mainly due to passenger transport by air and fuels and lubricants. Overall air fares fell in April after a rise in March, with the largest effect occurring for European flights. This contrasts with last year when air fares increased in April. Overall the price of fuels and lubricants increased this year by less than last year. The average price of petrol increased by 1.9 pence per litre between March and April this year, to stand at 108.2 pence, compared with a rise of 3.4 pence last year. By contrast diesel prices rose by 4.2 pence per litre this year compared with a rise of 2.5 pence last year, but the impact is smaller because petrol has a larger weight than diesel within the fuels and lubricants index.

There was a further large downward contribution from clothing and footwear. Prices of clothing fell this year but rose a year ago.

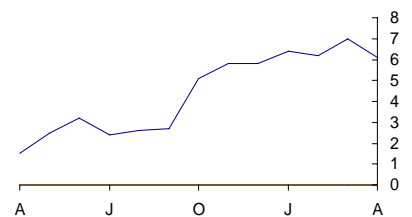

Housing and household services
CPI percentage changes over 12 months

Food and non-alcoholic beverages
CPI percentage changes over 12 months

Transport
CPI percentage changes over 12 months

¹ The CPI and RPI use different classification systems. Background Note 14 shows how, for each of the two indices, the main categories contributing to changes in the 12-month rate relate to each other

RPI

The largest upward contribution to the change in the RPI annual rate came from fuel and light. Average gas and electricity bills increased this year but decreased last year and the price of oil and other fuels rose by more than a year ago.

There were further large upward contributions from:

- Alcoholic drink where wine and spirits and beer prices increased by more than last year. The main effect is due to the increase in excise duty which was larger than last year
- Food where beef and some other meat prices rose this year but fell last year. Fresh fruit prices also rose this year but fell last year
- Household goods where a wide range of furniture prices fell by less than last year and some carpets increased this year but fell last year
- Household services where there was an upward effect from telephone services and fees and subscriptions, where foreign exchange commission rates rose this year but fell last year

There were small upward contributions from:

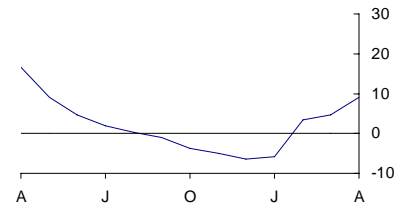

- Leisure services where foreign holiday prices rose this year but were largely unchanged last year
- Leisure goods where the effect came from audio visual goods and computer games
- Catering where the effect came from restaurant meals

The largest downward contribution to the change in the RPI annual rate came from motoring expenditure with petrol and oil prices rising by less than last year. The average price of petrol increased by 1.2 pence per litre between March and April this year, to stand at 107.6 pence, compared with a rise of 3.5 pence last year. By contrast diesel prices rose by 3.4 pence per litre this year compared with a rise of 2.7 pence last year, but the impact is smaller because petrol has a larger weight than diesel within the fuels and lubricants index. There was also a small downward effect from vehicle excise duty which increased by less than last year.

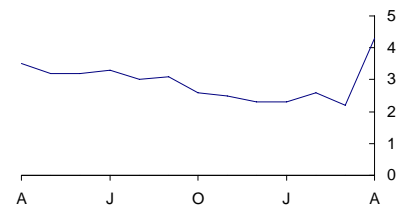

There were also large downward contributions from:

- Clothing and footwear where the price of men's clothing increased by less than last year and women's clothing was broadly unchanged compared with a rise in price last year
- Fares and other travel costs with air fares falling this year but rising last year
- Housing, due to house depreciation, with the smoothed DCLG house price index used to calculate this component falling, compared with a rise last year

¹Individual contributions to the change in the 12-month rate may not sum to the total due to rounding.

BACKGROUND NOTES

Relevance

1. The consumer prices index (CPI) is the main United Kingdom domestic measure of consumer price inflation for macroeconomic purposes. It forms the basis for the Government's inflation target that the Bank of England's Monetary Policy Committee (MPC) is required to achieve.
2. Internationally, the CPI is known as the Harmonised Index of Consumer Prices (HICP). HICPs are calculated in each Member State of the European Union, according to rules specified in a series of European Regulations developed by Eurostat in conjunction with the EU Member States. HICPs are used to compare inflation rates across the European Union. Since January 1999 it has also been used by the European Central Bank (ECB) as the measure of price stability across the euro area.
3. The retail prices index (RPI) is the most long-standing general purpose measure of inflation in the United Kingdom and is available from June 1947. It is used for a variety of purposes by both government and external users including the indexation of various incomes and prices and the uprating of pensions, benefits and index-linked gilts.

Methodology

4. The CPI and the RPI are compiled using the same underlying price data, based on a large and representative selection of around 650 individual goods and services for which price movements are measured in around 150 randomly selected areas throughout the UK. Around 120,000 separate price quotations are used every month to compile the indices. The outlets in which the prices are collected are selected randomly. Expenditure weights are held constant for one year at a time.
5. The selection of goods and services that are priced to compile the CPI and RPI is reviewed annually. The contents of the 2008 basket are described in an article published on the National Statistics website at:
<http://www.statistics.gov.uk/cci/article.asp?ID=1951>
The expenditure weights used to compile the indices are also updated each year. Additional details of the updated CPI and RPI weights for 2008 are available from the National Statistics website in an article entitled Consumer Prices Index and Retail Prices Index: Updating Weights for 2008:
<http://www.statistics.gov.uk/cci/article.asp?id=1991>

6. Rates of change for the CPI are calculated from unrounded index levels, rather than on the published indices, which are rounded to one decimal place. The use of unrounded indices increases the accuracy of the calculation. The unrounded index levels are available on request. By contrast, rates of change for the RPI are calculated from the published rounded indices.

Reliability

7. Once the RPI indices are published they are never revised. CPI indices are revisable although past revisions have been minimal with the exception of those arising from re-referencing of the CPI to 2005=100, which took place with the publication of the January 2006 indices.

Comparability

8. The CPI's coverage of goods and services was extended in stages in the areas of health, education, childcare and insurance, with effect from the January 2000, 2001, and 2002 indices. In 2000, there was also a change to the population basis for the weights which was broadened from private households to include expenditure by foreign visitors and residents of institutional households. Further details can be found in a series of articles: http://www.statistics.gov.uk/about/methodology_by_theme/cpi
9. The official CPI series starts in 1996 but estimates for earlier periods are available back to 1988. These estimates are broadly consistent with data from 1996 but should be treated with some caution. The following article provides more detail: <http://www.statistics.gov.uk/cci/article.asp?ID=31>
10. RPI data are available back to 1947 but have been re-referenced on several occasions since then, generally accompanied by changes to the coverage and/or structure of the detailed sub-components. Details of these changes are given in Appendices 1 and 2 of the CPI Technical Manual: <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328&More=N>

Coherence

11. The CPI and RPI both measure the average change from month to month in the prices of consumer goods and services purchased in the UK. However, they differ in both coverage and methodology. A detailed description of these differences is given in an article entitled "The New Inflation Target: the Statistical Perspective": www.statistics.gov.uk/StatBase/Product.asp?vlnk=10913. The differences are summarised below:
 - In the CPI, the geometric mean is used to combine the individual prices into elementary indices at the most basic level whereas the RPI uses arithmetic means
 - The CPI excludes a number of RPI series mainly relating to housing costs (for example, council tax), and in particular to owner occupiers' housing costs (including mortgage interest payments, house depreciation and buildings insurance). In addition, the CPI excludes the

annual road fund licence and, from 2006, TV licences which are classified as taxes in the UK National Accounts, and Trades Union subscriptions which by convention are not part of household expenditure

- The CPI includes series for university accommodation fees, foreign students' university tuition fees, and unit trust and stockbrokers' charges, none of which are included in the RPI
- The CPI is categorised according to the international classification system, COICOP (Classification Of Individual Consumption by Purpose). The way in which this maps to the RPI groupings is shown in the following table:

COICOP Divisions	RPI Groups
01 Food & non-alcoholic beverages	Food
02 Alcohol & tobacco	Alcoholic drink (off sales) Tobacco
03 Clothing & footwear	Clothing & footwear
04 Housing & household services	Housing (exc. Mortgage interest payments, depreciation, council tax & building insurance) Fuel & light
05 Furniture & household goods	Household goods Domestic services
06 Health	Personal goods & services (health-related items)
07 Transport	Motoring expenditure Fares & other travel costs
08 Communication	Household services (exc. domestic services & fees and subscriptions)
09 Recreation & culture	Leisure goods Leisure services
10 Education	Fees & subscriptions (education-related items)
11 Restaurants & hotels	Catering Alcoholic drink (on sales)
12 Miscellaneous goods & services	Personal goods & services (non health-related items) Fees & subscriptions (non education-related items)

- The index for the purchase of new cars in the CPI is quality adjusted and based on actual published prices for new cars. New car prices in the RPI are imputed from movements in second hand car prices
- The CPI weights are based on expenditure by all private households, foreign visitors to the UK and residents of institutional households. In the RPI, weights are based on expenditure by private households only, excluding the highest income households and pensioner households mainly dependent on state benefits
- In the construction of the CPI weights, amounts paid out in insurance claims are distributed among the COICOP headings according to the nature of the claims' expenditure, with the residual (the service charge) being allocated to the relevant insurance heading. For the RPI weights, total expenditure (that is, gross of claims paid out) is assigned to the relevant insurance heading

12. A breakdown of the difference between the CPI and RPI annual rates of inflation is shown in Table 10 of the CPI First Release.

Accessibility

13. This release includes the April 2008 data, collected on 15 April. Future publication dates are 17 June, 15 July, 12 August, 16 September, 14 October and 18 November. The European Commission (Eurostat) will release figures for the harmonised index of consumer prices (HICP) for the month of April 2008 for EU member states excluding the UK, together with an EU average, on 15 May 2008. Further information on HICP for the European Union, Eurozone and other EU Member States is available from Eurostat's HICP web page: http://epp.eurostat.ec.europa.eu/pls/portal/url/page/PGP_DS_HICP

Further information

14. A more detailed quality report for this First Release is available at: <http://www.statistics.gov.uk/CCI/article.asp?ID=1585>

15. A full description of how the CPI and RPI are compiled is given in the Consumer Price Indices Technical Manual 2007 edition: <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328>

General

16. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to contents of this release.

17. In line with Consumer Price Indices Pre-Release arrangements, an advance estimate of the CPI was provided to the Governor of the Bank of England 3½ working days ahead of publication. The Governor shared this information with the MPC and officials present at the MPC policy meeting, on Thursday 8 May.

18. Complete runs of series in this release are available to download free of charge at: <http://www.statistics.gov.uk/timeseries> .
19. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown Copyright 2008

¹ Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends No. 541 December 1998*. These details are also available on the National Statistics website: www.statistics.gov.uk/cpi/article.asp?ID=31

² The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi)

Key: - zero or negligible

² The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001. Details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi

¹ For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/cpi/article.asp?id=1060

1 Published as the CPI in the UK.

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004, 25 member states from May 2004, and 27 members from Jan 2007, the new member states being integrated using a chain index formula.

The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia from 1 May 2004 and Bulgaria and Romania from 1 Jan 2007.

4 The coverage of the Monetary Union Area index was extended to include Greece with effect from Jan 2001.

Key: - zero or negligible

Index date for April: 15 April 2008

1 Consumer durables: Furniture, furnishings, electrical appliances and other household equipment, men's, women's and children's outerwear, footwear, audio-visual equipment, CDs and tapes, toys, photographic and sports goods.

2 The taxes excluded are council tax, VAT, duties, vehicle excise duty, insurance tax and air passenger duty. There are no weights available for RPIY.

3 This series has been constructed using the index for all items excluding mortgage interest payments prior to February 1995.

1 The differences due to housing, coverage and formula effect are all calculated independently and are not additive.

Source: National Statistics

2 Difference due to use of different formulae to aggregate prices at the most basic level.

3 This difference is derived as a residual.
