Consumer price indices August 2007

In the year to August, the consumer prices index (CPI) rose by 1.8 per cent, down from 1.9 per cent in July.

In the year to August, the all items retail prices index (RPI) rose by 4.1 per cent, up from 3.8 per cent in July.

Over the same period, the all items RPI excluding mortgage interest payments index (RPIX) rose by 2.7 per cent, unchanged from July.

Main contributions to the change in the 12-month rate¹

CPI

The largest downward contribution to the change in the CPI annual rate came from miscellaneous goods and services, where there were reductions in the cost of financial services with some lenders cutting or eliminating their mortgage exit administration fees in light of the Financial Services Authority Statement of Good Practice for these charges. This required lenders to review their approach to these fees as there were concerns that consumers were being charged more than they had expected. There was also a large downward contribution from changes in the prices of a range of appliances and products for personal care.

There were also large downward effects from:

- Housing and household services, mainly due to gas and electricity bills which both fell as a result of the continued phasing in of tariff reductions. Over the same period last year, average gas and electricity bills rose; and
- Clothing and footwear, mainly due to women’s outerwear where prices rose with the introduction of the new season’s stock, but by less than last year.

A small downward effect came from furniture and household goods, mainly due to changes in the prices of major household appliances.

The largest upward effect on the CPI annual rate came from recreation and culture. A large upward contribution came from cultural services, due to changes in the cost of admission to live music events and theatres. A further small upward contribution came from recording media, in particular changes in the price of pre-recorded DVDs. A partially offsetting downward effect came from data processing equipment, with prices of PCs and laptops falling this year but rising a year ago.

A further large upward effect came from communication. Average landline bills rose this year, following changes to tariff structures and charges; last year, by contrast, there were cuts in line rental charges. There was also a small upward effect from mobile phone call charges, mainly due to increases in pay-as-you-go tariffs.

A small upward effect came from transport, mainly due to air travel and, to a lesser extent, sea travel, with fares for both rising by more than a year ago, particularly for international routes. A partially offsetting large downward effect came from cuts in road fuel prices, compared with increases a year ago.

Miscellaneous goods and services
CPI percentage changes over 12 months

Housing and household services
CPI percentage changes over 12 months

Recreation and culture
CPI percentage changes over 12 months

¹ The CPI and RPI use different classification systems. Background Note 11 shows how, for each of the two indices, the main categories contributing to changes in the 12-month rate relate to each other

RPI

The largest upward contribution to the change in the RPI annual rate came from housing. This was mainly due to an increase in average mortgage interest payments, with most lenders passing on July's quarter point increase in the Bank rate. Mortgage interest payments are excluded from the CPI.

Further large upward effects came from:

- Household services, due to changes in telephone charges where, as in the CPI, the main contributions came from landlines and, to a lesser extent, pay-as-you-go mobile phones; and
- Fares and other travel costs, mainly due to air fares for international routes rising by more than a year ago.

Small upward effects came from:

- Leisure services, due to changes in the cost of entertainment and recreation, particularly live music and, to a lesser extent, theatre admissions;
- Leisure goods, with prices rising by more than a year ago; and
- Food, mainly due to vegetable prices rising this year but falling a year ago.

The largest downward contribution to the change in the RPI annual rate came from fuel and light where, as in the CPI, average gas and electricity bills fell this year but rose a year ago. A further large downward effect came from clothing and footwear, mainly due to prices of women's outerwear rising by less than a year ago. Smaller downward contributions came from children's outerwear and other clothing.

There was a small downward effect from alcoholic drinks, due to changes in the prices of wines and spirits off-sales, particularly New World wines, and beer on-sales. Further small downward effects came from household goods and personal goods and services.

BACKGROUND NOTES

Relevance

- 1 The consumer prices index (CPI) is the main United Kingdom domestic measure of consumer price inflation for macroeconomic purposes. It forms the basis for the Government's inflation target that the Bank of England's Monetary Policy Committee (MPC) is required to achieve.
- 2 Internationally, the CPI is known as the Harmonised Index of Consumer Prices (HICP). HICPs are calculated in each Member State of the European Union, according to rules specified in a series of European Regulations developed by Eurostat in conjunction with the EU Member States. HICPs are used to compare inflation rates across the European Union. Since January 1999 it has also been used by the European Central Bank (ECB) as the measure of price stability across the euro area.
- 3 The retail prices index (RPI) is the most long-standing general purpose measure of inflation in the United Kingdom and is available from June 1947. It is used for a variety of purposes by both government and external users including the indexation of various incomes and prices and the uprating of pensions, benefits and index-linked gilts.

Methodology

- 4 The CPI and the RPI are compiled using the same underlying price data, based on a large and representative selection of around 650 individual goods and services for which price movements are measured in around 150 randomly selected areas throughout the UK. Around 120,000 separate price quotations are used every month to compile the indices. The outlets in which the prices are collected are selected randomly. Expenditure weights are held constant for one year at a time.
- 5 The selection of goods and services that are priced to compile the CPI and RPI is reviewed annually. The contents of the 2007 basket are described in an article published on the National Statistics website at:
<http://www.statistics.gov.uk/cci/article.asp?ID=1746>
The expenditure weights used to compile the indices are also updated each year. Additional details of the updated CPI and RPI weights for 2007 are available from the National Statistics website in an article entitled Consumer Prices Index and Retail Prices Index: Updating Weights for 2007
<http://www.statistics.gov.uk/cci/article.asp?id=1779>
- 6 Rates of change for the CPI are calculated from unrounded index levels, rather than on the published indices, which are rounded to one decimal place. The use of unrounded indices increases the accuracy of the calculation. The unrounded index levels are available on request. By contrast, rates of change for the RPI are calculated from the published rounded indices.

Reliability

- 7 Once the RPI indices are published they are never revised. CPI indices are revisable although past revisions have been minimal with the exception of those arising from re-referencing of the CPI to 2005=100, which took place with the publication of the January 2006 indices.

Comparability

- 8 The CPI's coverage of goods and services was extended in stages in the areas of health, education, childcare and insurance, with effect from the January 2000, 2001, and 2002 indices. In 2000, there was also a change to the population basis for the weights which was broadened from private households to include expenditure by foreign visitors and residents of institutional households. Further details can be found in a series of articles:
http://www.statistics.gov.uk/about/methodology_by_theme/cpi
- 9 The official CPI series starts in 1996 but estimates for earlier periods are available back to 1988. These estimates are broadly consistent with data from 1996 but should be treated with some caution. The following article provides more detail:
<http://www.statistics.gov.uk/cci/article.asp?ID=31&Pos=4&ColRank=1&Rank=1>
- 10 RPI data are available back to 1947 but have been re-referenced on several occasions since then, generally accompanied by changes to the coverage and/or structure of the detailed sub-components. Details of these changes are given in Appendices 1 and 2 of the CPI Technical Manual:
<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328&More=N>

Coherence

- 11 The CPI and RPI both measure the average change from month to month in the prices of consumer goods and services purchased in the UK. However, they differ in both coverage and methodology. A detailed description of these differences is given in an article entitled "The New Inflation Target: the Statistical Perspective":
www.statistics.gov.uk/StatBase/Product.asp?vlnk=10913. The differences are summarised below:
- In the CPI, the geometric mean is used to combine the individual prices into elementary indices at the most basic level whereas the RPI uses arithmetic means.
 - The CPI excludes a number of RPI series mainly relating to housing costs (for example, council tax), and in particular to owner occupiers' housing costs (including mortgage interest payments, house depreciation and buildings insurance). In addition, the CPI excludes the annual road fund licence and, from 2006, TV licences which are classified as taxes in the UK National Accounts, and Trades Union subscriptions which by convention are not part of household expenditure.
 - The CPI includes series for university accommodation fees, foreign students' university tuition fees, and unit trust and stockbrokers' charges, none of which are included in the RPI.

- The CPI is categorised according to the international classification system, COICOP (Classification Of Individual CONsumption by Purpose). The way in which this maps to the RPI groupings is shown in the following table:

COICOP Divisions	RPI Groups
01 Food & non-alcoholic beverages	Food
02 Alcohol & tobacco	Alcoholic drink (off sales) Tobacco
03 Clothing & footwear	Clothing & footwear
04 Housing & household services	Housing (exc. Mortgage interest payments, depreciation, council tax & building insurance) Fuel & light
05 Furniture & household goods	Household goods Domestic services
06 Health	Personal goods & services (health-related items)
07 Transport	Motoring expenditure Fares & other travel costs
08 Communication	Household services (exc. domestic services & fees and subscriptions)
09 Recreation & culture	Leisure goods Leisure services
10 Education	Fees & subscriptions (education-related items)
11 Restaurants & hotels	Catering Alcoholic drink (on sales)
12 Miscellaneous goods & services	Personal goods & services (non health-related items) Fees & subscriptions (non education-related items)

- The index for the purchase of new cars in the CPI is quality adjusted and based on actual published prices for new cars. New car prices in the RPI are imputed from movements in second hand car prices.
- The CPI weights are based on expenditure by all private households, foreign visitors to the UK and residents of institutional households. In the RPI, weights are based on expenditure by private households only, excluding the highest income households and pensioner households mainly dependent on state benefits.
- In the construction of the CPI weights, amounts paid out in insurance claims are distributed among the COICOP headings according to the nature of the claims' expenditure, with the residual (the service charge) being allocated to the relevant insurance heading. For the RPI weights, total expenditure (that is, gross of claims paid out) is assigned to the relevant insurance heading.

- 12 A breakdown of the difference between the CPI and RPI annual rates of inflation is shown in Table 10 of the CPI First Release.

Accessibility

- 13 This release includes the August 2007 data, collected on 14 August. Future publication dates are 16 October, 13 November, 18 December, 15 January, 2008, 12 February and 18 March. The European Commission (Eurostat) released figures for the harmonised index of consumer prices (HICP) for the month of August 2007 for EU member states excluding the UK, together with an EU average, on 14 September 2007. Further information on HICP for the European Union, Eurozone and other EU Member States is available from Eurostat's HICP web page:
http://epp.eurostat.ec.europa.eu/pls/portal/url/page/PGP_DS_HICP

Further information

- 14 A more detailed quality report for this First Release is available at:
<http://www.statistics.gov.uk/CCI/article.asp?ID=1585>
- 15 A full description of how the CPI and RPI are compiled is given in the Consumer Price Indices Technical Manual 2007 edition:
<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328>

General

- 16 Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to contents of this release.
- 17 Complete runs of series in this release are available to download free of charge at: <http://www.statistics.gov.uk/timeseries> . Alternatively, for low-cost tailored data call Online Services on 020 7533 5675 or email: tailored@statistics.gov.uk

¹ Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends No. 541 December 1998*. These details are also available on the National Statistics website: www.statistics.gov.uk/cpi/article.asp?ID=31

² The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi)

Key: - zero or negligible

² The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001. Details are given in a series of Economic Trends articles available on the National Statistics website: www.statistics.gov.uk/cpi

¹ For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/cpi/article.asp?id=1060

3 For further information on all of these services components, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/cci/article.asp?id=1060

1 Comprises 'Electricity, gas and other fuels' (group 04.5) and 'Fuels and lubricants' (class 07.2.2).

2 Comprises all other goods elements of the CPI. For further information, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: www.statistics.gov.uk/cci/article.asp?id=1060

1 Published as the CPI in the UK.

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004, 25 member states from May 2004, and 27 members from Jan 2007, the new member states being integrated using a chain index formula.

The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia from 1 May 2004 and Bulgaria and Romania from 1 Jan 2007.

4 The coverage of the Monetary Union Area index was extended to include Greece with effect from Jan 2001.

Key: - zero or negligible

Index date for August: 14 August 2007

1 Consumer durables: Furniture, furnishings, electrical appliances and other household equipment, men's, women's and children's outerwear, footwear, audio-visual equipment, CDs and tapes, toys, photographic and sports goods.

2 The taxes excluded are council tax, VAT, duties, vehicle excise duty, insurance tax and air passenger duty. There are no weights available for RPIY.

3 This series has been constructed using the index for all items excluding mortgage interest payments prior to February 1995.

1 The differences due to housing, coverage and formula effect are all calculated independently and are not additive.

Source: National Statistics

2 Difference due to use of different formulae to aggregate prices at the most basic level.

3 This difference is derived as a residual.
