## Index of production March 2008

In the first quarter of 2008, the seasonally adjusted chained volume index for the output of the production industries fell by 0.2 per cent compared with the previous quarter.

Between February and March output of the manufacturing industries fell by 0.5 per cent (note that monthly growth rates are volatile, see background note 2). There were widespread falls in manufacturing, with a significant decrease in output of 1.3 per cent in the transport equipment industries. There were no significant increases.

In the latest quarter, manufacturing output increased by 0.3 per cent, while mining and quarrying output decreased by 4.6 per cent and output of the electricity, gas and water supply industries decreased by 1.3 per cent, compared with the previous quarter.

		Production	Mining and quarrying	Manufacturing	Electricity gas and water	
<b>2003 weights</b>		1000.0	117.8	792.1	90.1	
		Production index level	Percentage change: latest three months on previous three months			
2007	Oct	99.9	-0.3	-1.4	-0.3	0.2
	Nov	99.5	-0.1	-0.9	-0.3	1.9
	Dec	99.5	0.2	-0.1	0.0	2.8
2008	Jan	99.4	-0.1	-1.9	0.0	1.4
	Feb	99.6	0.0	-2.8	0.3	0.2
	Mar	99.2	-0.2	-4.6	0.3	-1.3

**Mining and quarrying**

In the latest quarter, mining and quarrying output fell by 4.6 per cent compared with the previous quarter and was 4.5 per cent lower than the same period a year ago. Between February and March, mining and quarrying output increased by 0.5 per cent with a rise in gas production.

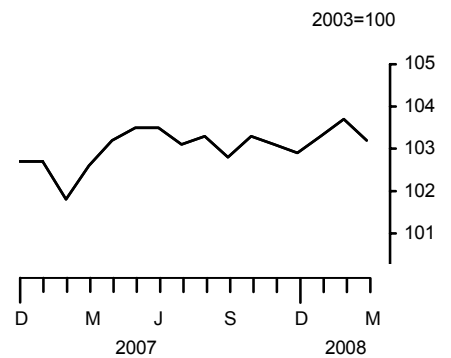

**Mining & quarrying**

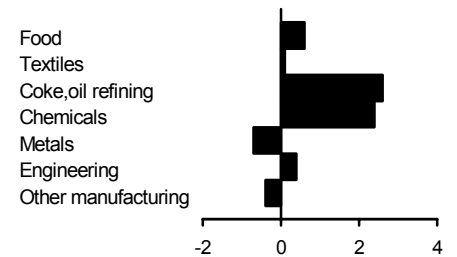

**Manufacturing**

Manufacturing output in the latest quarter rose by 0.3 per cent compared with the previous quarter. There were significant increases in output of 2.4 per cent in the chemicals and man-made fibres industries and 1.8 per cent in the machinery and equipment industries. There were no significant decreases. Manufacturing output in the latest quarter was 1.0 per cent higher than the same period a year ago.

**Manufacturing**

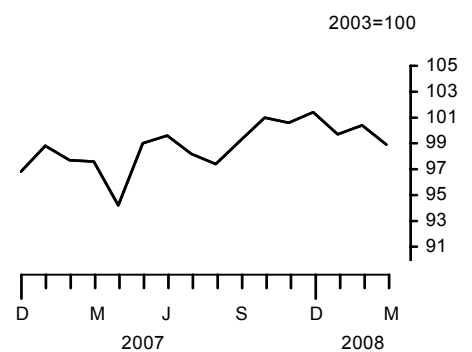

**Percentage change on previous three months**

**Electricity, gas and water supply**

Output of the electricity, gas and water supply industries in the latest quarter fell by 1.3 per cent compared with the previous quarter. Between February and March, energy supply output decreased by 1.4 per cent. In the latest quarter, output in this sector was 1.7 per cent higher compared with the same period a year ago.

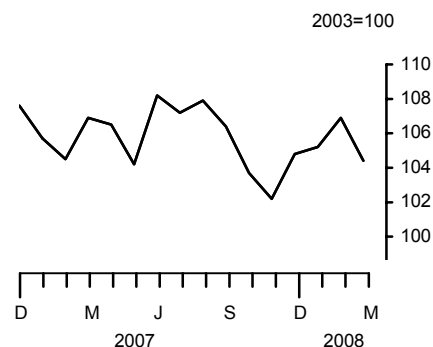

**Electricity, gas & water**

**Market sectors**

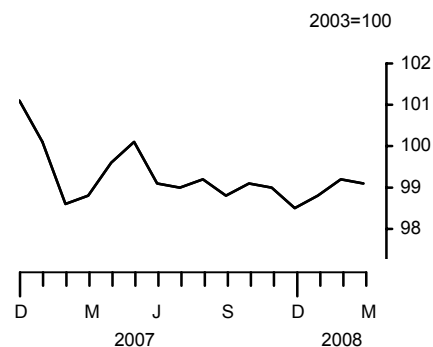

In the latest quarter, output of the consumer durable goods industries rose by 1.9 per cent compared with the previous quarter but was 0.2 per cent lower than the same period a year ago.

**Consumer durables**

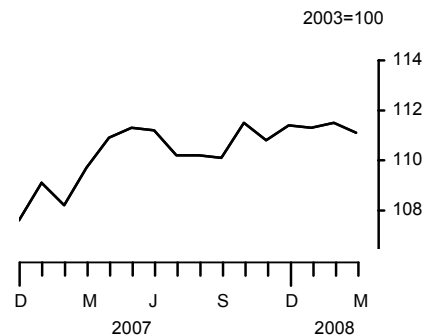

Output in the consumer non-durable goods industries rose by 0.2 per cent in the latest quarter compared with the previous quarter but was 0.1 per cent lower than the same period a year ago.

**Consumer non-durables**

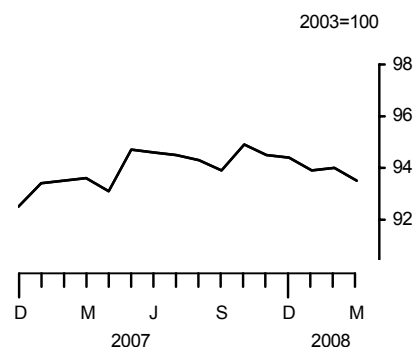

In the latest quarter, output of the capital goods industries remained unchanged compared with the previous quarter but was 2.1 per cent higher than the same period a year ago.

**Capital goods**

Output in the intermediate goods and energy industries fell by 0.8 per cent in the latest quarter compared with the previous quarter but was 0.3 per cent higher than the same period a year ago.

**Intermediate goods and energy**

## Revisions

This release conforms to the standard revisions policy for National Accounts. In this release the period open for revision is back to January 2008 only. Table IOP5R shows the revisions to the estimates previously published on 9 April 2008.

Since last month a number of late responses have been received to the Monthly Production Inquiry. The impact of these late data, when combined with revisions caused by seasonal adjustment factors being re-estimated, is to revise the growth rate for the Index of Production for January by -0.1 per cent but February is unrevised.

## BACKGROUND NOTES

1. This First Release gives details of the index of output of the production industries in the United Kingdom. Index numbers of output in this First Release are on the base 2003=100 and are classified to the 2003 revision to the Standard Industrial Classification (SIC). The production industries, which accounted for 18.6 per cent of gross domestic product in 2003, cover mining and quarrying (Section C), manufacturing (Section D) and electricity, gas and water supply (Section E).

### Interpreting the data

2. The monthly IoP data can be volatile. When looking at growth rates, it is recommended that users focus on the percentage change between the latest three months and the previous three months.

### Status of figures and planned future revisions

3. Figures for the most recent months are provisional and subject to revision in light of (a) late responses to the Monthly Production Inquiry and (b) revisions to seasonal adjustment factors which are re-estimated every period.

In the next release, which will contain figures for April 2008 and will be published on 10 June 2008, the earliest period open for revision according to the National Accounts policy will be January 2007.

4. In March 2008, a number of methodological changes were introduced to the construction of the IoP. At the same time the current level of detail that is published as part of the IoP dataset have also changed. Details of these planned changes can be found on the National Statistics website at:

<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=6230>

## Basic quality information for the IoP First Release

### Summary quality report

5. A Summary Quality Report for this First Release can now be found on the National Statistics website at:

<http://www.statistics.gov.uk/CCI/article.asp?ID=1846>

6. The 2005 median annual growth of MPI turnover, their associated standard errors and quality bands can now be found on the National Statistics website at:

<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=6230>

### Key quality issues

7. Common pitfalls in interpreting series: Expectations of accuracy and reliability in early estimates are often too high. Revisions are an inevitable consequence of the trade off between timeliness and accuracy. Early estimates are based on incomplete data.

Very few statistical revisions arise as a result of 'errors' in the popular sense of the word. All estimates, by definition, are subject to statistical 'error' but in this context the word refers to the uncertainty inherent in any process or calculation that uses sampling, estimation or modelling. Most revisions reflect either the adoption of new statistical techniques, or the incorporation of new information which allows the statistical error of previous estimates to be reduced. Only rarely are there avoidable 'errors' such as human or system failures, and such mistakes are made quite clear when they do occur.

### Reliability

8. One indication of the reliability of the key indicators in this release can be obtained by monitoring the size of revisions. The table below is based on the revisions which have occurred over the last five years. Please note that these indicators only report summary measures for revisions. The revised data may, themselves, be subject to sampling or other sources of error.

The table below presents a summary of the differences between the first estimates published between April 2002 and March 2007 and the estimates published 12 months later.

	Value in latest period (per cent)	Revisions between first publication and estimates twelve months later (% points)	
		Average over the last five years	Average over the last five years without regard to sign (average absolute revision)
Production output – 3 month on 3 month growth rate	-0.2	0.05	0.27
Manufacturing output – 3 month on 3 month growth rate	0.3	0.10	0.28
Production output – 1 month growth rate	-0.5	0.03	0.26
Manufacturing output – 1 month growth rate	-0.5	0.04	0.29

Spreadsheets giving revisions triangles of estimates for all months from December 1997 through to the current month, and the calculations behind the averages in the above table, are available on the National Statistics website at:

<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=6230>

9. A statistical test has been applied to the average revisions to find out if they are statistically significantly different from zero. No such differences have been found.
10. The table uses historical data for the most recent 60 months, comparing the estimate at first publication with the estimate as published 12 months later. The numbers which underpin these averages will include normal changes due to late data and re-seasonal adjustment, but also significant methodological changes, the most recent of which occurred in October 2003 (see article "Index of Production redevelopment" in *Economic Trends*, October 2002).

#### **Deflation**

11. All series, unless otherwise quoted, are measured at constant market prices. Deflators adjust the value series to take out the effect of price changes to give the volume series.

#### **Seasonal adjustment**

12. The index numbers in this First Release are all seasonally adjusted. This aids interpretation by removing annually recurring fluctuations, for example, due to holidays or other regular seasonal patterns. Unadjusted data are also available.

#### **Further information**

13. The complete run of data in the tables of this First Release are also available to view and download in electronic format free of charge using the ONS **Time Series Data service**. Users can download the complete release in a choice of zipped formats, or view and download their own selections of individual series. The Time Series Data service can be accessed at:  
<http://www.statistics.gov.uk/timeseries>

ONS provides an analysis of past revisions in the IoP and other First Releases which present time series. Details can be found at:

<http://www.statistics.gov.uk/cci/article.asp?ID=793>

ONS now publishes revisions triangles for all the main published key indicators on the National Statistics website. Details can be found at:

<http://www.statistics.gov.uk/cci/article.asp?ID=1026>

#### **Advance access**

14. Details of the policy governing the release of new data are available from the press office. Also available is a list of those given pre-publication access to the contents of this release.

**Code of Practice**

15. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown copyright 2008.
