## May 2002: East Midlands

All data are adjusted for seasonality unless otherwise specified

Latest Labour Force Survey data over the year to March 2002 indicate employment and unemployment stable in the East Midlands.

Data for the three months to March 2002 show the employment rate at 76.2 per cent, up 0.5 percentage points on a year earlier. The unemployment rate was 4.7 per cent, unchanged on a year earlier.

The claimant count was down in the year to April 2002.

		Level (thousands)	Rate (%)	Change on year (level)	Sampling variability (thousands)	Change on year (rate)	Sampling variability (%)
Employment*	Jan-Mar	2,039	76.2	33	$\pm 52$	0.5	$\pm 1.7$

See background note 2 on sampling variability.

\* Levels are for those aged 16 and over, rates are for those of working age (16-59/64).

\*\* Levels and rates are for those aged 16 and over. Rate is as a proportion of economically active.

+ Levels and rates are for those of working age.

.. Not available.

From May 2001: vacancies series deferred (see special note on page 5).

### New this month:

January to March 2002 data: latest three-month average LFS results;

April 2002 data: claimant count.

All data are adjusted for seasonality unless otherwise specified

**Employment (tables 1 to 6)**

The LFS estimate of employment in the East Midlands was 76.2 per cent in the January to March 2002 period, up 0.5 percentage points on the same period a year earlier. The employment level was 2.04 million in the January to March 2002 period, up 33,000 on the same period a year earlier.

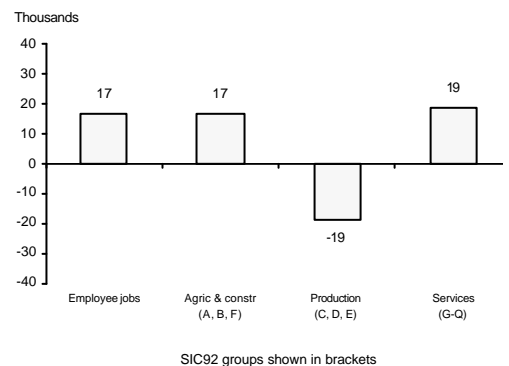

Seasonally adjusted employee jobs figures were down 2,000 in the quarter to December 2001.

Unadjusted employee jobs were up 17,000 in the year to December 2001. This was mainly due to a rise in construction and other industries, offset by a fall in the manufacturing sector.

**Employee jobs by industry**

Change on year from December 2000

**Unemployment (table 1)**

The ILO rate of unemployment in the East Midlands was 4.7 per cent in the January to March 2002 period, unchanged on the same period a year earlier. The rates for men and women in January to March 2002 were 4.9 and 4.6 per cent respectively.

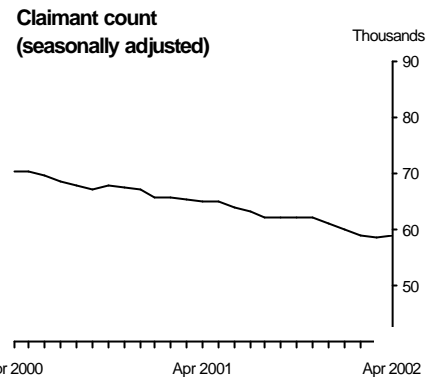

All data are adjusted for seasonality unless otherwise specified

**Claimant count (tables 7 and 8)**

The claimant count rate in April 2002 was 2.9 per cent, unchanged from March 2002, and down 0.3 percentage points since April 2001. The seasonally adjusted number of claimants in April 2002 was 59,100, up 300 on March 2002, and down 6,000 since April 2001. The unadjusted number of claimants was 61,700 in April 2002.

The unadjusted number of computerised claims of people aged 18 to 24 was 15,700 in April 2002, down 1,200 over the year. The number of computerised claims has fallen over the year for most age and duration groups.

**Economically active (tables 1 and 9)**

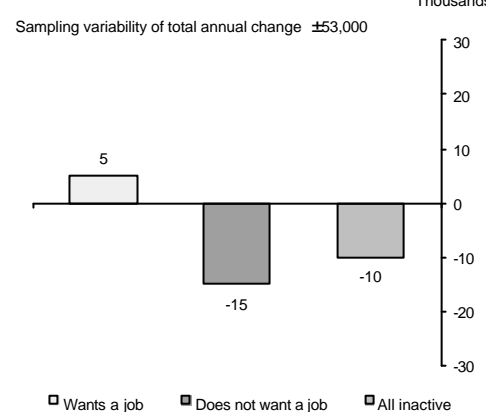

There were 2.14 million economically active people in the East Midlands in the January to March 2002 period.

**Economically inactive (tables 1, 10 and 11)**

The LFS estimate of economically inactive people in the East Midlands in the January to March 2002 period was 1.21 million, with 520,000 of these of working age. Over the year the number of economically inactive people of working age was down 10,000.

**Economic inactivity (working age)**

Change on year from Jan-Mar 2001

**Vacancies (table 12)**

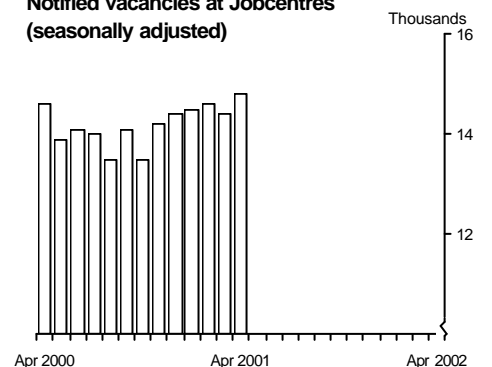

Publication of the Jobcentre vacancy statistics has been deferred.

Figures from May 2001 are affected by the introduction of Employer Direct – see note on page 5.

**Local area data (tables 13 to 16)**

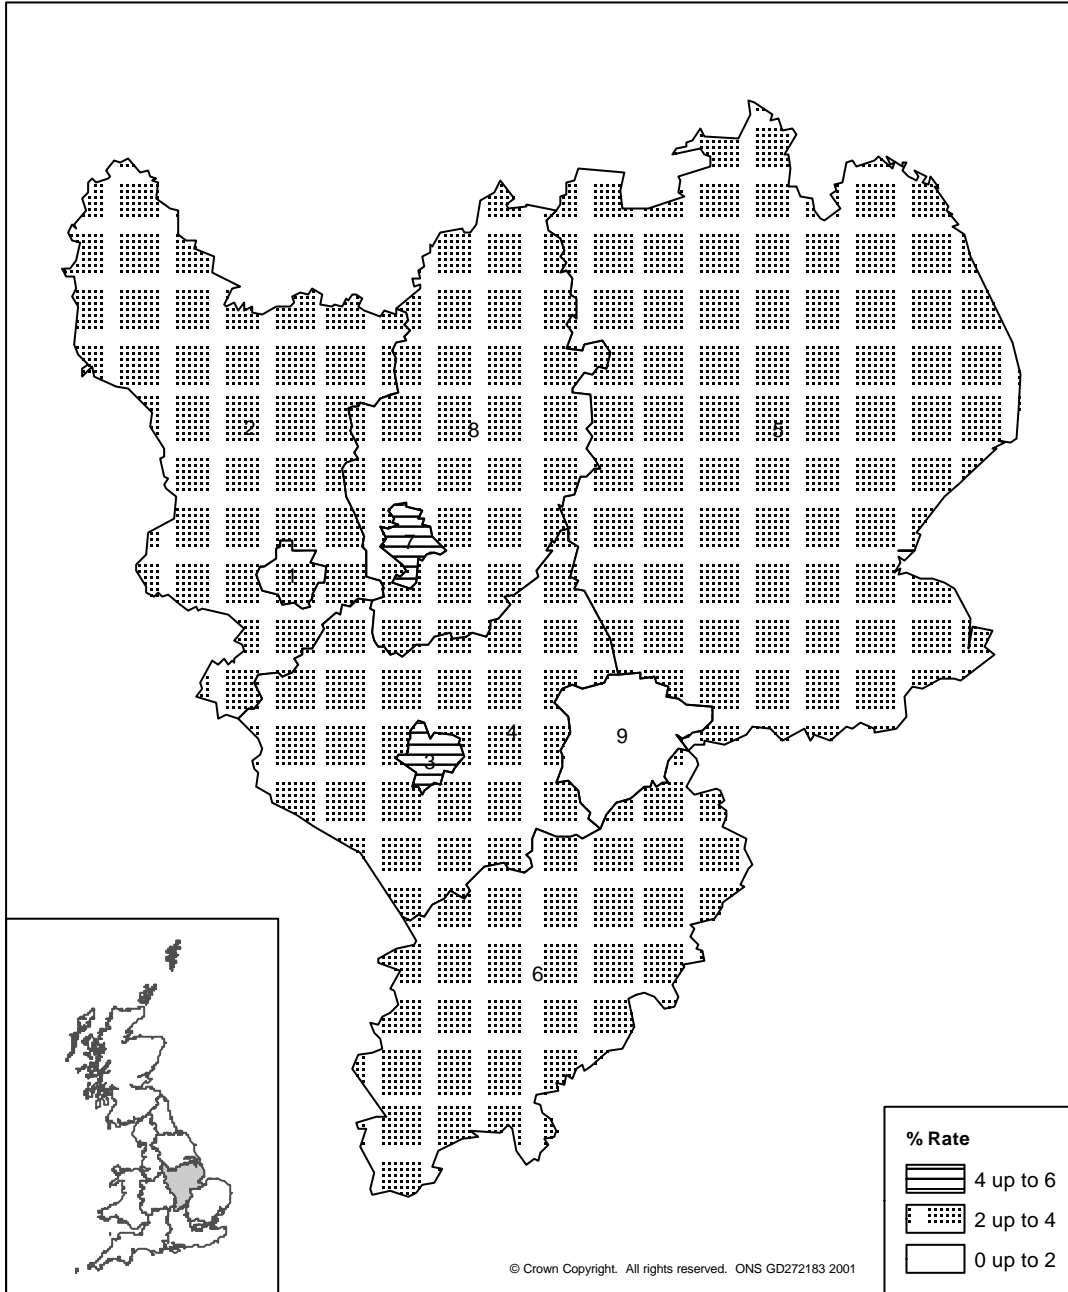

The unadjusted claimant count rate was lowest in Rutland UA, at 0.6 per cent. It was highest in Bolsover, at 5.6 per cent.

**Notified vacancies at Jobcentres (seasonally adjusted)**

All data are adjusted for seasonality unless otherwise specified

Unadjusted Claimant Count Rate by County/UA - April 2002 - East Midlands

1	Derby	3.8%
2	Derbyshire	3.1%
3	Leicester	4.7%
4	Leicestershire	2.2%
5	Lincolnshire	2.5%
6	Northamptonshire	2.2%
7	Nottingham	4.2%
8	Nottinghamshire	3.6%
9	Rutland	0.6%

All data are adjusted for seasonality unless otherwise specified

## REVISIONS

### Workforce Jobs

For the workforce jobs data, employee jobs for construction and agriculture and estimates of self-employment jobs are derived from the Labour Force Survey. Revised workforce jobs figures, including the revised regressed LFS results, are published for the first time in this First Release. Revisions are included from September 1998 to December 2001.

## NEXT MONTH

As announced in monthly issues of *Updates* since January, the June 2002 Labour Market First Release will be published on Friday 14 June.

## SPECIAL

### Vacancy data

Publication of Jobcentre vacancy statistics has been deferred due to distortions to the data. This release contains vacancy data only up to April 2001.

The introduction of Employer Direct, a major change which involves transferring the vacancy-taking process from local Jobcentres to regional Customer Service Centres, has affected the data since May 2001.

Employer Direct has been gradually introduced across Great Britain as part of Modernising the former Employment Service (now part of Jobcentre Plus) and has had the following effects:

- A temporary reduction in the recorded level of outflows and placings owing to some delays in following up vacancies with employers associated with the introduction of the new arrangements.
- An increase in the recorded level of newly-notified vacancies.
- Both the above effects have led to an increase in the recorded stock of unfilled vacancies.

Investigations show these effects are substantial for all the vacancy series. While they cannot be quantified precisely, the effects are large enough to prevent meaningful comparisons over time. Some of the distortions will also persist for a while after the full implementation of Employer Direct, which was completed in all regions at the end of January 2002. Publication of the Jobcentre vacancy statistics has therefore been deferred. ONS and the Department for Work and Pensions will continue to monitor and review the data with the aim of reinstating the series as soon as possible.

The publication of the vacancy figures for Northern Ireland has been suspended since March 1999 as a result of a discontinuity identified during the introduction of a new computer system for processing vacancies to local offices of the Department for Employment and Learning (DEL). In the course of correcting for this difficulty, further problems of a procedural nature came to light as contributory factors.

All data are adjusted for seasonality unless otherwise specified

These further issues have delayed the reinstatement of published vacancy figures for Northern Ireland. DEL have now introduced a new internet-based operational system for vacancies and have resumed publication of some non-seasonally adjusted vacancy data for Northern Ireland on a provisional basis. For the purposes of seasonally adjusted United Kingdom figures it has been assumed provisionally that the Northern Ireland figures have remained constant since February 1999 as follows: 8,900 for the stock of unfilled vacancies, 3,400 for inflows of vacancies notified, 3,400 for outflows, and 2,200 for placings. These are not estimates for Northern Ireland but assumptions for the purpose of continuity of the United Kingdom series up to April 2001.

### Claimant Count

The introduction of Joint Claims for Jobseeker's Allowance, on 19 March 2001, has had an upward effect on the claimant count. ONS estimates that the total impact on the count, which accumulated between April and August 2001, has been some 600 in the East Midlands region (approximately 200 men and 400 women) and 6,500 for the UK overall (approximately 2,200 men and 4,300 women).

The introduction of Joint Claims means that both members of certain couples are now required to claim JSA jointly and both are required to look for work. This applies to couples without dependent children where at least one member was born after 19 March 1976 and is aged over 18. The claimant count continues to include all individual claimants, so there are some extra claimants included as a result of this change.

It has been announced that Joint Claims for JSA will be extended in October 2002 to couples without dependent children where at least one member was born after 1957. The extent to which the introduction of Joint Claims may be treated as a discontinuity in the count, following past precedent, is difficult to assess at this stage but we will continue to monitor and review the effects. For information about previous treatment of discontinuities in the claimant count see, for example, the article '*Changes to the coverage of the monthly count of claimant unemployment*' in *Labour Market Trends*, November 1995, page 398.

### BACKGROUND NOTES

1. More information on the statistics in this release can be found in the *Guide to Labour Market Statistics Releases*, available from the labour market helpline 020-7533 6094. Information is also available on the National Statistics website at <http://www.statistics.gov.uk/themes/default.asp>.
2. Some data in this release are based on statistical samples and, as such, are subject to sampling variability. If many samples were drawn, each would give a different result. The ranges shown for the LFS data in this release and in the following table represent '95 per cent confidence intervals'. It is expected that in 95 per cent of samples the range would contain the true value. For more information, see the *Guide to Labour Market Statistics Releases*.

All data are adjusted for seasonality unless otherwise specified

- The LFS sample population covers those living in private households, student halls of residence and NHS accommodation.
- Annual local area data from the LFS are shown in table 13. Data from waves one and five of four quarters of the LFS were combined with an additional sample of interviews, in England, which improves the accuracy of the annual estimates for some local areas in England. Estimates of sampling variability - '95 per cent confidence intervals' - for each region, county, unitary authority and local authority district are shown in the table. There are now three publication thresholds - two thousand and four thousand, in addition to six thousand. For further information see Volume 6 of the *LFS User Guide*. This guide, along with additional data and further background information, are available on the National Statistics website at <http://www.statistics.gov.uk/lf/s>. A wide range of annual local area data from the LFS is available free from the Nomis® website at <http://www.nomisweb.co.uk>.

All data are adjusted for seasonality unless otherwise specified

5. Unadjusted claimant count and vacancies data are gathered from administrative sources and constitute a complete count. However, seasonally adjusted totals are presented as rounded to the nearest hundred to avoid spurious precision. Any differences between the sum of the rounded seasonally adjusted figures and the UK totals are due to this rounding.
6. Claimant count flows are the number of people joining or leaving the count in the period between the count dates. They are therefore affected by the number of weeks between count dates. To enable comparisons from month to month, the flows figures are standardised to a 4.33-week month before seasonal adjustment.
7. A claimant count rate is defined as the number of claimants resident in an area as a percentage of the corresponding mid-year estimate (or the latest available mid-year estimate, currently for June 2000) of the sum of claimants and workforce jobs in the area. The number of workforce jobs is mainly collected through postal employer surveys and comprises employee jobs, self-employment jobs, HM armed forces and government-supported trainees.
8. The count of Jobseeker's Allowance claimants is mostly derived from the Jobcentre Plus computer records. However for various reasons, e.g. when a claimant's National Insurance number is not known, a few claims have to be dealt with manually by local offices. These claims, which amount to less than 1 per cent of the total, are thus counted separately and not analysed in as much detail as the computerised claims. In particular, only the computerised claims are analysed by age and duration on a monthly basis.
9. Travel-to-Work areas (table 15) are approximations to self-contained labour markets, i.e. areas where people both live and work.
10. NUTS (Nomenclature des Unités Territoriales Statistiques) (table 17) was established by the Statistical Office of the European Union (Eurostat) to provide a uniform breakdown of territorial units for the production of regional statistics. NUTS is a five-level hierarchical classification.
11. The employee jobs series is based on data from employer surveys and is subject to sampling variability. The nature of the survey means that the size of this sampling variability may not be consistent from year to year. Provisionally ONS would expect that the 95 per cent confidence interval would on average be within +/- 6 per cent of the estimate. However, this will vary from region to region.
12. Labour market statistics are compiled from a wide range of sources. Claimant count and Jobcentre vacancy data are provided from the Jobcentre Plus administrative system; workforce jobs are derived from ONS business surveys; other data come from the ONS Labour Force Survey.
13. The Social Survey Division of ONS carries out the questionnaire design, sample selection and interviewing for the LFS. Analysis and publication of the results of the survey is undertaken by Labour Market Division. In Northern Ireland, the Labour Force Survey is conducted by the Central Survey Unit.

All data are adjusted for seasonality unless otherwise specified

14. In addition to the data in this release, ONS can provide a wide range of detailed labour market data in a number of formats. In particular, data are available from Nomis<sup>®</sup> at the same time as this release is published. Further data are also published in *Labour Market Trends (LMT)* and the *Labour Force Survey Quarterly Supplement to LMT*.
15. Some of the series in the attached tables are also available from the National Statistics Databank Service. The four-letter series identifier is shown at the top of each column for those series included on the Databank. For more information about the Databank service, ring 020-7533 5675. In addition, many of the individual series can also be found on the National Statistics website (<http://www.statistics.gov.uk>), using the STATBASE TIMEZONE service. Choose Access Data and look for the Labour Market Statistics Integrated First Release in the list of releases and then select the table that contains the series that you require.
16. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to the contents of this release.
17. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

Data source: Labour Force Survey

\* Denominator = all persons of working age.

Labour Market Statistics Helpline 020-7533 6094

\*\* Denominator = Total economically active.

The Labour Force Survey is a survey of the population in private households, student halls of residence and NHS accommodation.

+ Quarter to quarter changes at regional level are particularly subject to sampling variability and should be interpreted in the context of changes over several quarters rather than in isolation.

Some of the series in this table are available electronically through the ONS Time Series Data service. See background note 14 for further details

The Workforce Jobs series measures jobs rather than people, therefore, second self-employment jobs (where the main job is an employee) are now included in this series.

Workforce jobs enquiries 01633 812318

Civilian Workforce Jobs figures come from a variety of sources. Employee Jobs (which is much the largest component of Civilian Workforce Jobs) come from quarterly surveys of employers carried out by Prices & Business Group (PBG) of ONS and Administrative Returns.

Other data sources are Self-employment Jobs provided by the LFS and Government-supported trainees provided by ES Training Data Systems.

Source: Employer surveys

Workforce jobs enquiries 01633 812318

Employee jobs figures are of a measure of jobs rather than people. For example, if a person holds two jobs, each job will be counted in the employee jobs total. Employees jobs figures come from quarterly surveys of employers carried out by Prices & Business Group (PBG) of ONS and Administrative returns.

The quarterly employer surveys used to compile employee jobs figures do not collect data by Government Office Regions (GOR). Instead, Annual Business Inquiry (ABI) data are used to pro-rate the totals obtained from the quarterly surveys to generate GOR data. This technique can lead to the sum of the industry figures not matching the "All jobs" total in column 2.

\* Count of claimants of unemployment-related benefit, ie. Jobseeker's Allowance

Source: Jobcentre Plus administrative system

<sup>##</sup>Denominator = Claimant count + Workforce jobs. See background note 7.

Labour Market Statistics Helpline 020-7533 6094

The claimant count inflows, standardised to a 4.33 week month but not seasonally adjusted, for April 2002 were 15,575 in total,

11,065 for men and 4,510 for women. The corresponding outflow figures were 12,126 men and 4,719 women.

\*\* Flow figures are collected for 4 or 5 week periods between count dates; the figures are then converted to a standard 4 1/3 week month.

# Months where there are 5 weeks between count dates. All the rest are 4 week periods.

\* Count of claimants of unemployment-related benefits, ie. Jobseeker's Allowance

Source: Jobcentre Plus administrative system

Relationship between columns: 2= 3+4+5; 8= 9+10+11

Labour Market Statistics Helpline 020-7533 6094

# Months where there are 5 weeks between count dates. All the rest are 4 week periods.

Only computerised claims are analysed by age and duration on a monthly basis. These figures therefore differ in total from those given in table 7. The latter include clerically processed claims which currently amount to less than 1 per cent of the total claimant count. See background note 8.

\* Count of claimants of unemployment-related benefits, ie. Jobseeker's Allowance

Source: Jobcentre Plus administrative system

Relationship between columns: 14=15+16+17; 20=21+22=23

Labour Market Statistics Helpline 020-7533 6094

# Months where there are 5 weeks between count dates. All the rest are 4 week periods.

Only computerised claims are analysed by age and duration on a monthly basis. These figures therefore differ in total from those given in table 7. The latter include clerically processed claims which currently amount to less than 1 per cent of the total claimant count. See background note 8.
