

Output in the construction industry

2nd quarter 2009

Date: 4 September 2009

Coverage: Great Britain **Theme:** Natural and Built Environment

The total volume of construction output in the second quarter of 2009 fell by 0.5 per cent compared with the first quarter of 2009. This small fall follows a large fall in the first quarter of 2009 of 8 per cent. All new work rose by 1 per cent while repair and maintenance fell by 2 per cent. The total volume of construction output in the 12 months to the second quarter of 2009 fell by 10 per cent compared with the previous 12 month period.

Construction output (constant (2005) prices, seasonally adjusted)

		Housing new work	Non-housing new work	Housing repair and maintenance	Non-housing repair and maintenance	Total output
<i>£ million</i>						
2006		21,995	40,150	23,210	23,009	108,364
2007		22,188	42,357	23,041	23,366	110,952
2008	R	18,325	44,156	23,677	23,546	109,705
2007	Q1	5,603	10,136	5,856	5,848	27,442
2007	Q2	5,686	10,466	5,816	5,713	27,680
2007	Q3	5,628	10,836	5,474	5,870	27,808
2007	Q4	5,271	10,919	5,895	5,936	28,022
2008	Q1	5,158	11,335	5,758	6,060	28,311
2008	Q2	4,720	11,097	6,109	6,097	28,023
2008	Q3	4,420	11,197	5,819	5,910	27,346
2008	Q4 R	4,062	10,527	5,991	5,480	26,025
2009	Q1 P	3,657	9,830	5,304	5,187	23,978
2009	Q2 R	3,601	9,956	5,324	4,982	23,863

R = revised P = provisional

The total volume of new work in the 12 months to the second quarter of 2009 was 12 per cent lower compared with the previous 12 months but was 1 per cent higher in the second quarter when compared with the previous quarter. The total volume of repair and maintenance work fell by 7 per cent in the 12 months to the second quarter of 2009 compared with the previous 12 months and was 2 per cent lower in the second quarter of 2009 compared with the previous quarter.

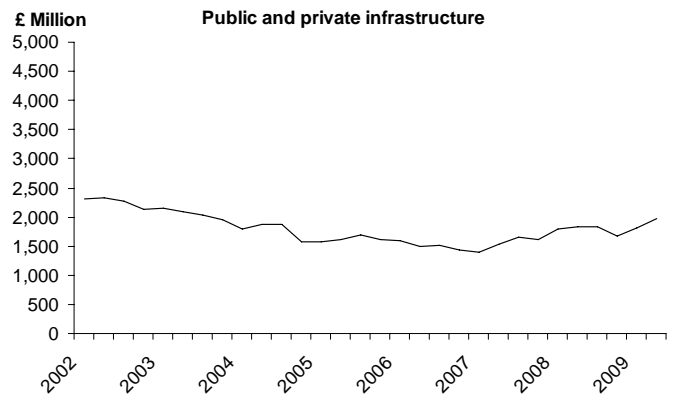

New housing

New private housing work in the 12 months to the second quarter of 2009 was 28 per cent lower compared with the previous 12 months and the second quarter of 2009 was 3 per cent lower compared with the previous quarter. New work in the public housing sector in the 12 months to the second quarter of 2009 was 7 per cent lower (on a small base figure) compared with the previous 12 months but the second quarter of 2009 was 3 per cent higher than the previous quarter.

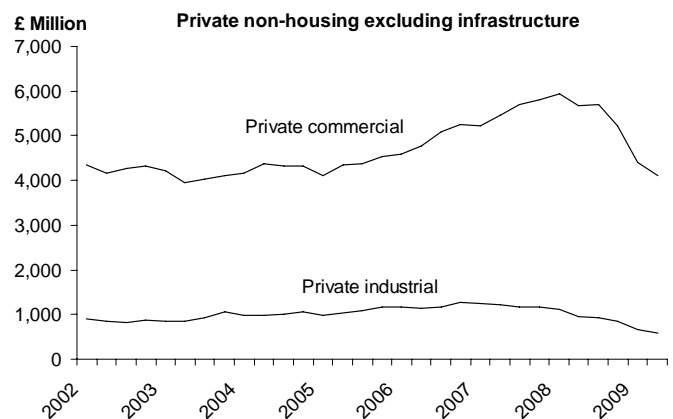

New Infrastructure

New infrastructure output in the 12 months to the second quarter of 2009 was 6 per cent higher compared with the previous 12 months and the second quarter of 2009 was 8 per cent higher compared with the previous quarter.

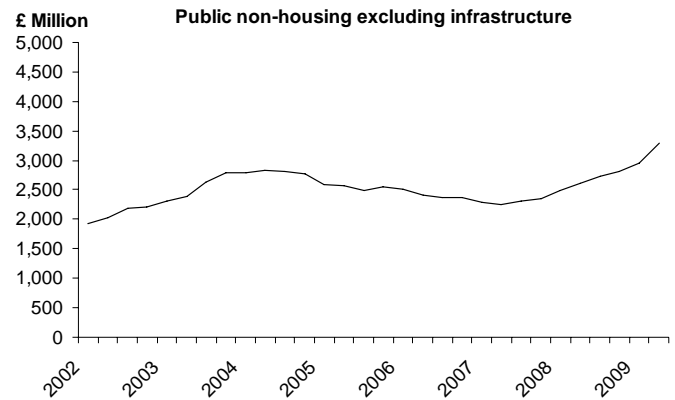

New private non-housing

New construction work in the private industrial sector in the 12 months to the second quarter of 2009 was 31 per cent lower compared with the previous 12 months and was 11 per cent lower in the second quarter of 2009 compared with the previous quarter. New private commercial output in the 12 months to the second quarter of 2009 was 16 per cent lower compared with the previous 12 months and was 7 per cent lower in the second quarter of 2009 compared with the previous quarter.

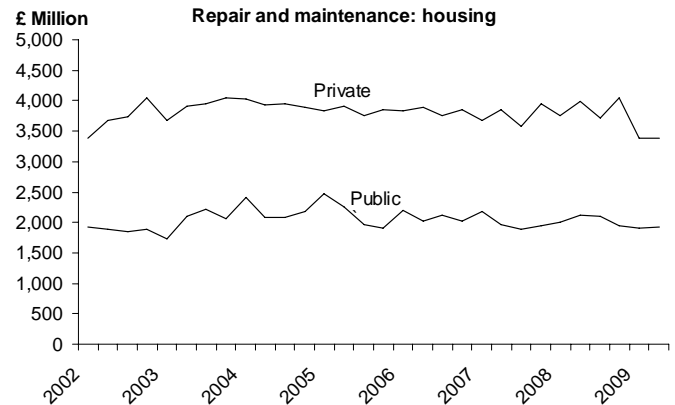

New public non-housing

New work in the public non-housing sector (excluding infrastructure) in the 12 months to the second quarter of 2009 rose by 21 per cent compared with the previous 12 months and also rose by 12 per cent in the second quarter of 2009 compared with the previous quarter.

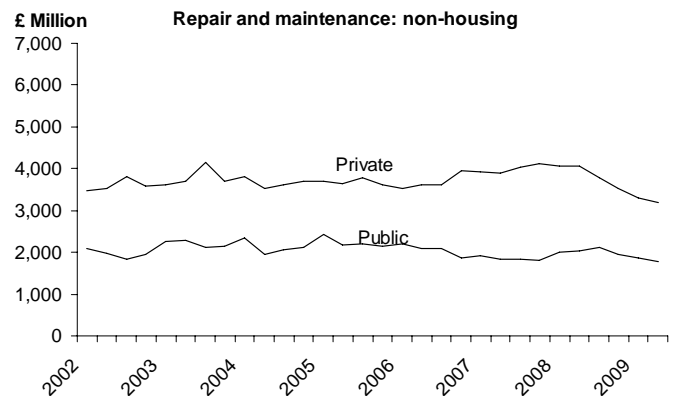

Housing repair and maintenance

Housing repair and maintenance work (including improvement work) in the public sector fell by 1 per cent in the 12 months to the second quarter of 2009 compared with the previous 12 months but rose by 1 per cent in the second quarter of 2009 compared with previous quarter. Housing repair and maintenance work in the private sector in the 12 months to the second quarter of 2009 was 5 per cent lower compared with the previous 12 months and was unchanged in the second quarter of 2009 compared with the previous quarter.

Non-housing repair and maintenance

Repair and maintenance work in the public non-housing sector in the 12 months to the second quarter of 2009 was unchanged compared with the previous 12 months but was 5 per cent lower in the second quarter of 2009 compared with the previous quarter. Repair and maintenance work in the private non-housing sector in the 12 months to the second quarter of 2009 was 15 per cent lower compared with the previous 12 months and was 3 per cent lower in the second quarter of 2009 compared with the previous quarter.

Revisions

Construction output may be revised following publication of the first quarterly estimate. Revisions to the output series for the first quarter of 2009 and for the fourth quarter of 2008 are caused by revisions to the price and cost indices used to deflate the current prices to constant (2005) prices.

Revisions to construction output (constant (2005) prices seasonally adjusted) growth rates

		New work	Repair and maintenance	Total construction output
2008	Q4	0.02	0.00	0.01
2009	Q1	2.30	0.00	1.29

Background Notes

Relevance to users

1. The Statistical Bulletin brings together information on the output of the construction industry in Great Britain. It draws on data compiled from quarterly sample surveys of construction contractors and of public sector direct construction labour as well as an estimate of the output of the unrecorded sector (the self-employed and firms operating below the VAT threshold). The construction industry, which contributes to the overall estimate of Gross Domestic Product (GDP) by approximately 6 per cent, covers Section F of the Standard Industrial Classification 2003.
2. Similar data for Northern Ireland is provided by the Northern Ireland Statistics and Research Agency at: <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=13904>
3. Responsibility for construction output, employment and new orders statistics transferred from the Department for Business, Innovation and Skills (BIS) to the Office for National Statistics on 1 March 2008. The statistics published in this release continue to be based on the methodology developed by BIS. ONS is carrying out a review of the data collected and methodology in order to bring these in line with standard ONS procedures. A revised data collection and publication procedure is expected in 2010.
4. ONS has already completed a review into the provision of consistent and coherent employment information. As a result of this review the table 'Construction industry employees and total employment' is no longer included in this release. Information relating to employment in the construction industry is instead available in the Labour Market Statistics Statistical Bulletin at:
<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=1944>

Accuracy

5. Revisions to previous periods: Figures for the recent quarters are provisional and subject to revision as later information becomes available.
6. Figures marked 'R' indicate that the data have been revised since the last edition.

Deflation and seasonal adjustment

7. The headline data are given in constant 2005 prices, seasonally adjusted. Deflators adjust the value series to take out the effect of price changes to give the volume series. Deflation of output is carried out sectorally, and a range of relevant tender price, materials price and labour price indices are used.
8. Seasonal adjustment aids interpretation by removing annually recurring fluctuations, for example, due to climate, hours of daylight, holidays or other regular seasonal patterns. Unadjusted data are also available.

Further information

9. Spreadsheets containing the data published in this Statistical Bulletin, as well as further breakdowns and previous ONS releases can be found at:
<http://www.statistics.gov.uk/STATBASE/Product.asp?vlnk=725>
10. Releases on construction output and employment prior to the transfer to ONS can be found on the BIS website at:
<http://stats.bis.gov.uk/construction/output/>
11. Related releases on orders for new construction in Great Britain are published at:
<http://www.statistics.gov.uk/STATBASE/Product.asp?vlnk=720>
12. The Construction Statistics Annual publication brings together a wide range of statistics that are currently available on the construction industry from a number of different sources. This is published at:
<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=284>

Publication policy

13. Details of the policy governing the release of new data are available from the Media Relations Office.
14. National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.
