## Producer prices

### December 2006

The output price index for home sales of manufactured products rose 2.2 per cent in the year to December, compared with a rise of 1.8 per cent in the year to November.

Unadjusted, the index rose 0.2 per cent between November and December, mainly reflecting rises in petroleum and food product prices.

If passed on in full, the changes in excise duty on fuel announced in the Pre-Budget Report would have increased the index by about 0.1 per cent in December.

The output price index excluding excise duties (PPIY) rose 2.1 per cent in the year to December and 0.1 per cent between November and December. Seasonally adjusted, the index rose 0.4 per cent between November and December.

The output price index excluding food, beverages, tobacco and petroleum rose 2.3 per cent in the year to December. In seasonally adjusted terms, the index rose 0.1 per cent between November and December.

## Input prices: summary

The input price index for materials and fuels purchased by manufacturing industry rose 2.0 per cent in the year to December and rose 0.3 per cent between November and December. The rise in the input index between November and December mainly reflected price rises in crude oil and food prices, partly offset by falls in all other product group prices. Prices of imported materials as a whole (including imported crude oil) fell 0.1 per cent between November and December.

Seasonally adjusted, the input price index rose 0.1 per cent between November and December.

The input price index for manufacturing industry excluding the food, beverages, tobacco and petroleum industries rose 2.7 per cent in the year to December. Seasonally adjusted, the index fell 0.6 per cent between November and December.

### **Revisions (Tables 9R and 10R)**

For this release Tables 9R and 10R highlight revisions to price indices previously published in last month's First Release.

The revisions to headline price indices highlighted in Tables 9R and 10R were caused by changes to latest estimates as more price quotes are received and also revisions to seasonal adjustment factors which are re-estimated every month.

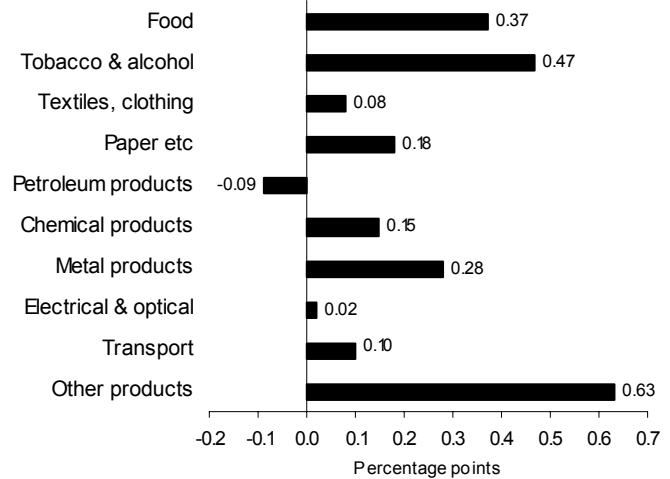

**Output prices: detail**

The contributions to movements in the total output index by the main product groups over the last year and month (not seasonally adjusted) are:

**12 month change to December**

Product group <sup>1</sup>	Percentage change
Food	2.4
Tobacco & alcohol	3.6
Textiles, clothing	1.0
Paper etc	1.9
Petroleum products	-0.9
Chemical products	2.5
Metal products	3.3
Electrical & optical	0.5
Transport	1.3
Other products	3.9
<b>All manufacturing</b>	<b>2.2</b>

**Contribution to 12 months percentage change in total (2.2%)**

**1 month change to December**

Product group <sup>1</sup>	Percentage change
Food	0.4
Tobacco & alcohol	0.3
Textiles, clothing	0.0
Paper etc	0.0
Petroleum products	1.2
Chemical products	0.1
Metal products	0.0
Electrical & optical	-0.2
Transport	0.0
Other products	-0.1
<b>All manufacturing</b>	<b>0.2</b>

**Contribution to 1 month percentage change in total (0.2%)**

1. See web link in Background Notes paragraph 6 for the definition of each product

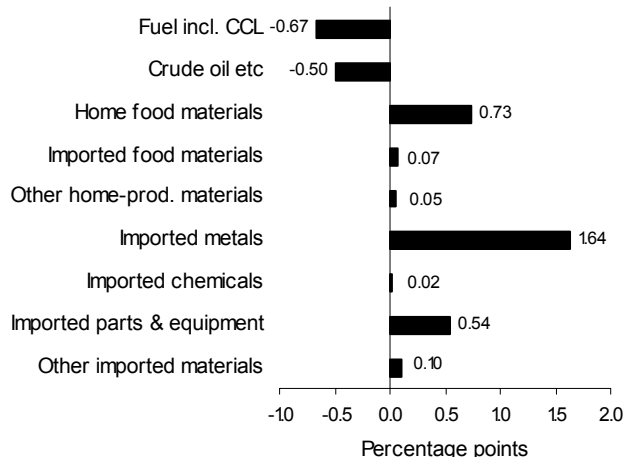

**Input prices (materials and fuels): detail**

The contributions to movements in the total input index by the main commodities over the year and month (not seasonally adjusted) are:

**12 month change to December<sup>2</sup>**

Commodity group <sup>1</sup>	Percentage change
Fuel incl. CCL	-5.1
Crude oil etc	-2.8
Home food materials	9.8
Imported food materials	1.7
Other home-prod. materials	3.4
Imported metals	21.9
Imported chemicals	0.2
Imported parts & equipment	2.3
Other imported materials	1.0
<b>All manufacturing</b>	<b>2.0</b>

**Contribution to 12 months percentage change in total (2.0%)**

**1 month change to December<sup>2</sup>**

Commodity group <sup>1</sup>	Percentage change
Fuel incl. CCL	-0.9
Crude oil etc	4.1
Home food materials	2.3
Imported food materials	-0.9
Other home-prod. materials	-0.3
Imported metals	-0.7
Imported chemicals	-0.4
Imported parts & equipment	-0.9
Other imported materials	-0.1
<b>All manufacturing</b>	<b>0.3</b>

**Contribution to 1 month percentage change in total (0.3%)**

1. See web link in Background Notes paragraph 6 for the definition of each commodity  
 2. Including Aggregates Levy

## BACKGROUND NOTES

1. Index numbers shown in the main text of this First Release are on a net sector basis. The index for any sector relates only to transactions between that sector and other sectors: sales and purchases within sectors are excluded. However, the more detailed figures shown in Tables 5 and 7 are on a gross basis; that is, intra industry sales and purchases are included in each of these indices.
2. Indices relate to average prices for a month. The full effect of a price change occurring partway through any month will only be reflected in the following month's index.
3. All index numbers exclude VAT. Excise duties (on cigarettes, manufactured tobacco, alcoholic liquor and petroleum products) are included, except where labelled otherwise.

### Status of figures and planned future revisions

4. Figures for the latest two months are provisional and the latest five months are subject to revisions in light of (a) late and revised respondent data and (b) revisions to seasonal adjustment factors which are re-estimated every month. A routine seasonal adjustment review is conducted in the autumn annually. There are no other planned methodological changes in the next 12 months.

### Revisions

5. Revisions to data provide one indication of the reliability of key indicators. The tables below show summary information on the size and direction of the revisions which have been made to the data covering a five year period.

A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (\*) shows that the test is significant.

The table below presents a summary of the differences between the first estimates published between December 2000 and November 2005 and the estimates published 12 months later. These numbers include revisions as a result of methodological changes made when the series were rebased to 2000=100 in October 2003. For more information see

[http://www.statistics.gov.uk/articles/economic\\_trends/ETAugMorris.pdf](http://www.statistics.gov.uk/articles/economic_trends/ETAugMorris.pdf)

	Value in latest period	Revisions between first publication and estimates twelve months later	
		Average over the last 5 years	Average over the last 5 years without regard to sign (average absolute revision)
Total output (PLLU) 12 months %	+2.2	-0.02	0.09
Total output (PLLU) 1 months %	0.2	0.01	0.06
Total input (RNNK) 12 months %	+2.0	-0.22	0.74
Total input (RNNK) 1 months %	0.3	0.01	0.38

Spreadsheets giving revisions triangles of estimates for all months from January 1998 through to November 2006, and the calculations behind the averages in the table is available on the National Statistics website at <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=790>

6. More information on the PPI, including the definition of the product groups on page 4 and 5 of this release and the input and output weights can be found under related links at [www.statistics.gov.uk/ppi](http://www.statistics.gov.uk/ppi)
7. The detailed input indices of prices of materials and fuels purchased by industry (table 7) do not include the Climate Change Levy. This is because each industry can in practice pay its own rate for the various forms of energy, depending on the various negotiated discounts (and exemptions) that apply.
8. The complete run of data in the tables of this First Release are also available to view and download in other electronic formats free of charge using the ONS Time Series Data website service. Users can download the complete release in a choice of zipped formats, or view and download their own selections of individual series. The Time Series Data service can be accessed at <http://www.statistics.gov.uk/timeseries>
9. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to the contents of this release.
10. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown Copyright 2007.

<sup>1</sup> The Climate Change Levy was introduced in April 2001.

B The values with 'B' are considered less reliable than the remainder currently published mainly due to the lack of market coverage  
p = provisional  
r = revised
