# Producer prices

## May 2008

The output price index for home sales of manufactured products rose 8.9 per cent in the year to May, compared with the rise of 7.6 per cent in the year to April. Unadjusted, the index rose 1.6 per cent between April and May, mainly reflecting rises in other manufactured product prices and petroleum products.

Output prices  
12 months percentage change

The output price index excluding excise duties (PPIY) rose 9.2 per cent in the year to May. Seasonally adjusted, the index rose 1.4 per cent between April and May.

The output price index excluding food, beverages, tobacco and petroleum rose 5.9 per cent in the year to May. In seasonally adjusted terms the index rose 1.2 per cent between April and May.

### Input prices: summary

The input price index for materials and fuels purchased by manufacturing industry rose 27.9 per cent in the year to May and rose 3.5 per cent between April and May.

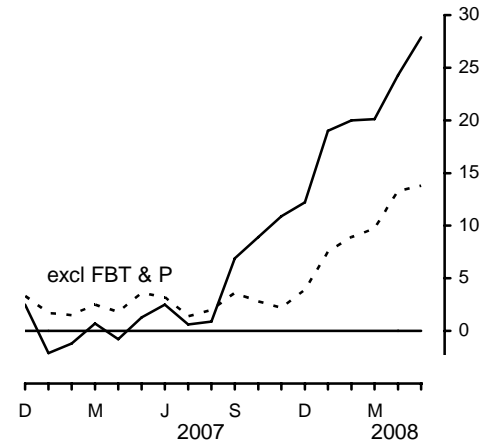

The rise in the input index between April and May mainly reflected a rise in the price of crude oil.

Prices of imported materials as a whole (including imported crude oil) rose 2.7 per cent between April and May.

Seasonally adjusted, the input price index rose 3.8 per cent between April and May.

The input price index for manufacturing industry excluding the food, beverages, tobacco and petroleum industries rose 13.8 per cent in the year to May. Seasonally adjusted, the index rose 1.2 per cent between April and May.

1 These indices include the Climate Change Levy which was introduced in April 2001

2 These indices include the Aggregates Levy which was introduced in April 2002

### **Revisions (Tables 9R and 10R)**

For this release Tables 9R and 10R highlight revisions to price indices previously published in last month's First Release.

The revisions to headline price indices highlighted in Tables 9R and 10R were caused by changes to latest estimates as more price quotes are received and also revisions to seasonal adjustment factors which are re-estimated every month.

The headline input price index for April 2008 has been revised upwards by 0.9 per cent. This revision is large when compared with previous revisions. The revision was mainly caused by gas and crude oil prices being revised upward as forecasts were replaced by actual data. A warning that revisions to gas prices might be large for April was included in last month's First Release.

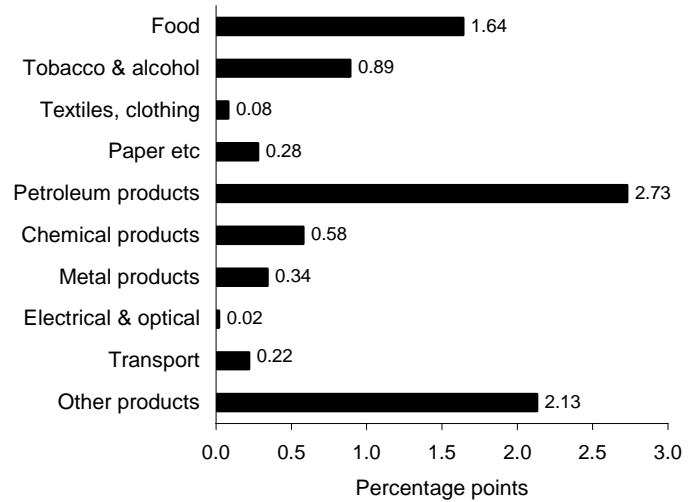

## Output prices: detail

The contributions to movements in the total output index by the main product groups over the last year and month (not seasonally adjusted) are:

### 12 month change to May

Product group	Percentage change
Food	11.0
Tobacco & alcohol	6.5
Textiles, clothing	1.0
Paper etc	3.1
Petroleum products	28.5
Chemical products	9.8
Metal products	4.0
Electrical & optical	0.4
Transport	2.7
Other products	12.7
<b>All manufacturing</b>	<b>8.9</b>

### Contribution to 12 months percentage change in total (8.9%)

### 1 month change to May

Product group	Percentage change
Food	2.0
Tobacco & alcohol	0.5
Textiles, clothing	0.2
Paper etc	0.5
Petroleum products	3.9
Chemical products	0.7
Metal products	0.6
Electrical & optical	0.1
Transport	0.2
Other products	3.7
<b>All manufacturing</b>	<b>1.6</b>

### Contribution to 1 month percentage change in total (1.6%)

**Input prices (materials and fuels): detail**

The contributions to movements in the total input index by the main commodities over the year and month (not seasonally adjusted) are:

**12 month change to May**

Product group	Percentage change
Fuel incl. CCL	25.6
Crude oil etc	83.8
Home food materials	31.1
Imported food materials	23.5
Other home-prod. materials	9.3
Imported metals	8.4
Imported chemicals	14.8
Imported parts & equipment	10.1
Other imported materials	13.0
<b>All manufacturing</b>	<b>27.9</b>

**Contribution to 12 months percentage change in total (27.9%)**

**1 month change to May**

Product group	Percentage change
Fuel incl. CCL	-0.6
Crude oil etc	11.0
Home food materials	1.0
Imported food materials	2.7
Other home-prod. materials	-0.4
Imported metals	1.0
Imported chemicals	1.5
Imported parts & equipment	1.2
Other imported materials	1.7
<b>All manufacturing</b>	<b>3.5</b>

**Contribution to 1 month percentage change in total (3.5%)**

## BACKGROUND NOTES

### BASIC QUALITY INFORMATION

#### Link to Summary Quality Report

1. A Summary Quality Report for the PPI can be found at [http://www.statistics.gov.uk/about/data/methodology/quality/information\\_business\\_statistics.asp](http://www.statistics.gov.uk/about/data/methodology/quality/information_business_statistics.asp). This report describes, in detail, the intended uses of the statistics presented in this publication, their general quality and the methods used to produce them.

#### Relevance to users

2. Index numbers shown in the main text of this First Release are on a net sector basis. The index for any sector relates only to transactions between that sector and other sectors: sales and purchases within sectors are excluded. However, the more detailed figures shown in Tables 5 and 7 are on a gross basis; that is, intra industry sales and purchases are included in each of these indices.
3. Indices relate to average prices for a month. The full effect of a price change occurring partway through any month will only be reflected in the following month's index.
4. All index numbers exclude VAT. Excise duties (on cigarettes, manufactured tobacco, alcoholic liquor and petroleum products) are included, except where labelled otherwise.
5. The detailed input indices of prices of materials and fuels purchased by industry (table 7) do not include the Climate Change Levy. This is because each industry can in practise pay its own rate for the various forms of energy, depending on the various negotiated discounts (and exemptions) that apply.

#### Common pitfalls in interpreting series

6. Expectations of accuracy and reliability in sample surveys are often too high. Revisions and sampling variability are inevitable consequences of the trade off between timeliness, accuracy and the burden on respondents. Details of sampling variability are included elsewhere in this release.
7. Very few statistical revisions arise as a result of 'errors' in the popular sense of the word. All estimates, by definition, are subject to statistical 'error' but, in this context, the word refers to the uncertainty in any process or calculation that uses sampling, estimation or modelling. Most revisions reflect either the adoption of new statistical techniques or the incorporation of new information which allows the statistical error of previous estimates to be reduced. Only rarely are there avoidable 'errors' such as human or system failures, and such mistakes are made quite clear when they are discovered and corrected.

### Accuracy

8. Figures for the latest two months are provisional and the latest five months are subject to revisions in light of (a) late and revised respondent data and (b) revisions to seasonal adjustment factors which are re-estimated every month. A routine seasonal adjustment review is conducted in the autumn annually. There are no other planned methodological changes in the next 12 months.

### Revisions

9. Revisions to data provide one indication of the reliability of key indicators. The tables below show summary information on the size and direction of the revisions which have been made to the data covering a five year period. A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (\*) shows that the test is significant.

10. The table below presents a summary of the differences between the first estimates published between May 2002 and April 2007 and the estimates published 12 months later. These numbers include revisions as a result of methodological changes made when the series were rebased to 2000=100 in October 2003. For more information see [http://www.statistics.gov.uk/articles/economic\\_trends/ETAugMorris.pdf](http://www.statistics.gov.uk/articles/economic_trends/ETAugMorris.pdf)

#### Revisions between first publication and estimates twelve months later

	Value in latest period	Revisions between first publication and estimates twelve months later	
		Average over the last 5 years	Average over the last 5 years without regard to sign (average absolute revision)
Total output (PLLU) 12 months %	8.9	0.00	0.07
Total output (PLLU) 1 months %	1.6	0.02	0.06
Total input (RNNK) 12 months %	27.9	-0.22	0.71
Total input (RNNK) 1 months %	3.5	0.09	0.37

11. Spreadsheets giving revisions triangles of estimates for all months from January 1998 through to April 2008, and the calculations behind the averages in the table is available on the National Statistics website at: <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=790>

## PUBLICATION POLICY

12. The complete run of data in the tables of this First Release are also available to view and download in other electronic formats free of charge using the ONS Time Series Data website service. Users can download the complete release in a choice of zipped formats, or view and download their own selections of individual series. The Time Series Data service can be accessed at <http://www.statistics.gov.uk/timeseries>

13. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to the contents of this release.

14. **National Statistics** are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown Copyright 2008.

<sup>1</sup> The Climate Change Levy was introduced in April 2001.

B The values with 'B' are considered less reliable than the remainder currently published mainly due to the lack of market coverage

p = provisional

r = revised
