

UK trade

June 2009

Date: 11 August 2009

Coverage: United Kingdom **Theme:** The Economy

The UK's deficit on trade in goods and services was £2.2 billion in June, compared with the deficit of £1.9 billion in May.

The deficit on trade in goods was £6.5 billion, compared with the deficit of £6.2 billion in May.

Excluding oil and erratic items, the volumes of both exports and imports were two and a half per cent higher compared with May.

Export and import prices both fell by a half per cent compared with May.

Balance of trade

		Balance on trade in goods			Balance on trade in services	Total balance
		EU	Non-EU	World		
<i>Seasonally adjusted: £ billion</i>						
2009	Jan	-2.1	-5.5	-7.6	4.8	-2.8
	Feb	-2.9	-3.8	-6.8	4.1	-2.7
	Mar	-3.1	-3.4	-6.5	3.7	-2.7
	Apr	-3.0	-4.0	-7.0	4.1	-2.9
	May	-3.0	-3.2	-6.2	4.3	-1.9
	Jun	-2.8	-3.6	-6.5	4.3	-2.2

NOTE: Trade in services estimates are included to give a more complete picture of UK trade. These estimates have been derived from a number of sources, and some components are based on recent trends. They should be used with appropriate caution.

TRADE IN GOODS - JUNE

Value of total trade in goods

The UK's deficit on trade in goods in June is provisionally estimated at £6.5 billion, compared with £6.2 billion in May. The deficit with EU countries in June was £2.8 billion, compared with £3.0 billion in May. The deficit with non-EU countries in June was £3.6 billion, compared with £3.2 billion in May.

In June, total exports of goods rose by one and a half per cent to £18.3 billion and total imports of goods rose by two per cent to £24.7 billion. Exports to EU countries rose by five per cent while exports to non-EU countries fell by two and a half per cent. Imports from EU countries rose by two and a half per cent and imports from non-EU countries rose by two per cent.

In the second quarter, the deficit on trade in goods narrowed by £1.2 billion to £19.6 billion. The deficit with EU countries widened by £0.6 billion to £8.7 billion, and the deficit with non-EU countries narrowed by £1.8 billion to £10.9 billion.

In the second quarter, exports of goods fell by two and a half per cent and imports of goods fell by three and a half per cent. Exports to EU countries fell by three and a half per cent and exports to non-EU countries fell by one per cent. Imports from EU countries fell by one and a half per cent and those from non-EU countries fell by five and a half per cent.

The latest estimate of the trend suggests that the whole world goods deficit is narrowing slightly. The trends in the value of trade show both exports and imports falling slightly in recent months.

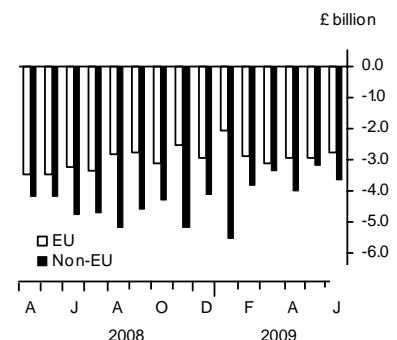

Balance on trade in goods

Value of trade in goods

Balance on trade in goods

Volume of total trade in goods (excluding oil and erratics)

Provisional estimates show that the volumes of exports and imports both rose by two and a half per cent compared with May.

In the second quarter, exports fell by two per cent and imports fell by three per cent compared with the previous quarter.

Changes in trade associated with VAT MTIC fraud mean that comparisons of volume and prices (both including and excluding trade associated with VAT MTIC fraud) should be treated with a great deal of caution.

Latest estimates of volume trends show both exports and imports falling slightly in recent months.

Volume of exports (goods) excluding oil and erratic items

Volume of imports (goods) excluding oil and erratic items

		EU		Non-EU		World	
		Exports	Imports	Exports	Imports	Exports	Imports
<i>Seasonally adjusted: 2005 = 100</i>							
2009	Jan	86.7	83.1	84.6	104.8	85.8	91.6
	Feb	84.2	84.3	96.9	103.3	89.6	91.7
	Mar	77.6	82.8	96.2	95.7	85.5	87.8
	Apr	83.4	83.2	92.3	99.9	86.9	89.7
	May	79.2	81.8	89.6	90.6	83.2	85.2
	Jun	83.4	84.6	88.8	91.8	85.3	87.4

Export and import prices (trade in goods)

June's provisional estimates show that export and import prices both fell by a half per cent compared with May.

In the second quarter, export and import prices both fell by a half per cent. Therefore, the terms of trade were unchanged compared with the previous quarter.

Export and import prices (goods)

COMMODITY ANALYSIS OF TRADE IN GOODS

Trade in oil

In June, the balance on trade in oil was in deficit by £0.3 billion, compared with a surplus of £0.1 billion in May.

In the second quarter, the deficit on trade in oil was £0.3 billion, compared with a deficit of £0.7 billion in the previous quarter.

Trade in crude oil

Trade in other commodities in the second quarter 2009

For exports, all the main commodity groups showed a fall in volume, except basic materials, and food, drink and tobacco. Within finished manufactures, exports of intermediate goods rose by a half per cent. Exports of capital goods fell by nine per cent, exports of cars fell by four and a half per cent, and exports of consumer goods other than cars fell by four per cent. Within semi-manufactures, exports of chemicals fell by two per cent, and exports of other semi-manufactured goods fell by four and a half per cent.

Volume of exports of goods (finished manufactures)

For imports, food, drink and tobacco and basic materials showed a rise in volume. Finished manufactures showed a fall in volume whilst the volume of semi manufactured goods imports was unchanged. Within finished manufactures, imports of cars rose by 11 per cent. Imports of intermediate goods fell by seven per cent and imports of capital goods fell by five and a half per cent. Imports of consumer goods other than cars fell by two and a half per cent. Within semi manufactures, imports of chemicals fell by two per cent, and imports of other semi-manufactured goods fell by three per cent.

Volume of imports of goods (finished manufactures)

GEOGRAPHICAL ANALYSIS OF TRADE IN GOODS: in the second quarter 2009

Exports by country

Within the G7 group of countries, exports to the USA fell by £1.0 billion. Exports to Germany, France and Japan all fell by £0.2 billion. Among other countries, exports to the Netherlands fell by £0.3 billion.

Value of exports of goods by country

3 month percentage changes

Imports by country

Within the G7 group of countries, imports from the USA fell by £1.2 billion and imports from Canada fell by £0.2 billion. Among our other trading partners, imports from the Irish Republic rose by £0.3 billion, and imports from South Africa by £0.2 billion. Imports from Norway fell by £0.9 billion, and from the Netherlands fell by £0.6 billion.

Value of imports of goods by country

3 month percentage changes

TRADE IN SERVICES – JUNE

The UK's surplus on trade in services is provisionally estimated at £4.3 billion, unchanged compared with May.

In the second quarter, the surplus on trade in services was £12.6 billion, unchanged compared with the previous quarter. Exports of services fell by £0.3 billion to £41.6 billion and imports of services fell by £0.3 billion to £29.0 billion.

REVISIONS

Table 13R shows revisions to the main aggregates since the last Trade Statistical Bulletin of 9 July 2009. The revisions to trade in goods from April 2009 onwards reflect revised data from Her Majesty's Revenue and Customs and other data suppliers, revised estimates of trading associated with VAT MTIC fraud, later survey data on trade prices and a re-assessment of seasonal factors.

Value of trade in services

Background Notes

Basic quality information

1. **Key Issues specific to this release**

There are no key issues to report that are specific to this bulletin.

For general issues regarding the interpretation of the series, please see the “Common pitfalls in interpreting series” section below.

2. **Link to Summary Quality Report**

A Summary Quality Report for this Statistical Bulletin and associated data can be found on the National Statistics website at:

<http://www.statistics.gov.uk/CCI/article.asp?ID=1723>.

3. **Relevance to users**

- A paper entitled *Statistics on Trade in Goods* (GSS Methodological Series No. 36) describing the basis on which trade in goods statistics are compiled and the methodology employed to derive volume and price indices is available on the National Statistics website: <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=14943>.
- The Overseas Trade Statistics (OTS) data used as inputs to the release are collected and published by Her Majesty’s Revenue and Customs (HMRC) on an International Merchandise Trade Statistics (IMTS) basis.
- The implied price deflators derived by comparing current to chained volume measures data are not the same as the price indices published in this release because the former are current weighted while the latter are base (2005) weighted.

4. **Common pitfalls in interpreting series**

Very few statistical revisions arise as a result of ‘errors’ in the popular sense of the word. All estimates, by definition, are subject to statistical ‘error’ but, in this context, the word refers to the uncertainty in any process or calculation that uses sampling, estimation or modelling. Most revisions reflect either the adoption of new statistical techniques or the incorporation of new information which allows the statistical error of previous estimates to be reduced. Only rarely are there avoidable ‘errors’ such as human or system failures and such mistakes are made quite clear when they are discovered and corrected.

5. **VAT Missing Trader Community (MTIC) fraud**

- Import figures for trade in goods include adjustments to allow for the impact of VAT MTIC fraud. The adjustments were introduced for the first time in the UK trade May 2003

First Release published on 9 July 2003 and accompanied by an article explaining the fraud and the impact on the trade figures (<http://www.statistics.gov.uk/CCI/article.asp?ID=402>). A follow-up report was published on 17 February 2005 which summarises the work carried out to review the estimates of the impact on the trade figures <http://www.statistics.gov.uk/CCI/article.asp?ID=1066>.

The adjustments to trade in goods relate only to part of the carousel version of VAT MTIC fraud. This fraud leads to under recording of imports as fraudsters import goods from the EU, which they then sell on before disappearing without paying VAT on that sale. The goods are eventually exported. Such exports are declared and are therefore already reflected in the UK's trade in goods statistics.

- Changes to the pattern of trading associated with MTIC fraud can make it difficult to analyse trade by commodity group and by country as changes in the impact of activity associated with this fraud affect both imports and exports. Originally, most carousel chains only involved EU member states. From 2004 in particular, some carousel chains included non-EU countries, for example, Dubai and Switzerland. However, the MTIC trade adjustments are added to the EU import estimates derived from Intrastat returns as it is this part of the trading chain that is not generally recorded. In particular, adjustments affect trade in capital goods and intermediate goods - these categories include mobile phones and computer components, which are still the most widely affected goods. International convention determines that the treatment of the impact is to adjust imports upwards by the relevant amounts of missing declarations (non-response). However, users may wish to interpret short term movements in exports and imports excluding that part of the fraudulent activity that is not included in the import estimates, and for this purpose an analysis of the export and import figures with the VAT MTIC adjustments excluded has been produced.
- The following tables show quarterly values of imports and exports of goods for both current price estimates and chained volume measures excluding the VAT MTIC fraud adjustment, and a breakdown for current price estimates into trade with the EU and non-EU separately. Also, it includes the estimated monthly data for the adjustment for trade associated with VAT MTIC fraud, and for total trade excluding the adjustment for trade associated with VAT MTIC fraud, at current prices.

Trade in goods excluding adjustments to trade associated with MTIC fraud¹

¹ The adjustments are for the missing declarations (non response) and do not reflect the overall level of MTIC-related trade

6. **Accuracy**

- Trade in goods figures for the most recent months are provisional and subject to revision in the light of (a) late trader data, revisions to trade prices and revised estimates of trading associated with VAT MTIC fraud, and (b) revisions to seasonal adjustment factors which are re-estimated every month.
- Trade in services estimates have been derived from a number of monthly and quarterly sources. For components where no monthly data are available, estimates have been derived on the basis of recent trends. The results should be used with appropriate caution, as they are therefore likely to be less reliable than those for trade in goods. More details of the data sources, estimation methodology and reliability of the monthly estimates of trade in services were set out in *Economic Trends* (November 1996 and September 1997).

7. **Reliability**

Revisions to data provide one indication of the reliability of key indicators. The table below show summary information on the size and direction of the revisions which have been made to the data covering a five year period. A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (*) shows that the test is significant. An article explaining the past revisions performance for UK Trade statistics and what is being done to improve the first published estimates was published on 9 February 2005 at <http://www.statistics.gov.uk/cci/article.asp?id=1063>. The table covers estimates of UK trade first published from June 2003 (for April 2003) to May 2008 (March 2008). A spreadsheet giving these estimates and the calculations behind the averages in the table is available on the National Statistics website at <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=1119>.

£million

	Value in latest period	Revisions between first publication and estimates twelve months later	
		Average over the last 5 years (mean revision)	Average over the last 5 years without regard to sign (average absolute revision)
Total trade exports (IKBH)	32208	1043*	1073
Total trade imports (IKBI)	34384	1010*	1058
Total trade balance (IKBJ)	-2176	33	377

An article analysing past revisions to quarterly balance of payments current account data was published in the May 2007 edition of *Economic & Labour Market Review*. It is available on the National Statistics website at:

http://www.statistics.gov.uk/elmr/05_07/downloads/ELMR_May07.pdf.

More information about revisions material in First Releases can be found on the National Statistics website: <http://www.statistics.gov.uk/cci/article.asp?ID=793>.

8. Coherence

EU enlargement and country coverage. Two more countries joined the EU from 1 January 2007. These countries were Bulgaria and Romania. In addition, the coverage of EMU countries was extended to include Slovenia. In order to enable users to make long-run comparisons, data for the new definition EU and non-EU was produced from January 1998 onwards for value, and from January 1999 onwards for volume and price indices. At the same time data for the old definitions is no longer being maintained. There are additional series for country groupings on the old definitions. From January 2008, the coverage of EMU countries was extended to cover Cyprus and Malta, and from January 2009 the coverage of EMU countries has been extended to cover Slovakia. Some EU and non EU breakdowns of commodity data for Chained Volume Measures which are available from the Statbase® service may be less reliable than the current price data. Please consult Peter Gittins on 01633 455610 if you are considering using them.

Data have been combined for the United States and Puerto Rico, and for Dubai, Abu Dhabi, and Sharjah (the United Arab Emirates) from January 2009 onwards. Estimates are available for the United States and Dubai separately up till the end of 2008 on request.

9. **Classifications and Definitions.** The Overseas Trade Statistics (OTS), on which the BoP trade data are based, have been compiled under the United Nations Standard International Trade Classification Revision 4 (SITC R4) from January 2007 but the data have been converted back to SITC R3 for this release and the Monthly Review of External Trade Statistics (MRETS) publication in order to help users to compare data over time. There are some discontinuities at detailed levels, particularly between capital and intermediate goods where some products are allocated from January 2007 to intermediate goods rather than capital goods as done previously. It is also possible that volume and price changes between 2006 and 2007 may be less reliable than for other periods.

Notes on tables

10. **Rounding** The sum of constituent items in tables may not always agree exactly with the totals shown due to rounding.
11. **Symbols**
- .. Not applicable
 - Nil or less than half the final digit shown.

PUBLICATION POLICY

12. Supplementary data for this Statistical Bulletin – Monthly Review of External Trade Statistics – Business Monitor MM24; and quarterly data analysed by industry according to the Standard Industrial Classification - UK Trade in Goods analysed in terms of industries - Business Monitor MQ10 are also available free of charge as PDF files on the National Statistics website (www.statistics.gov.uk/bop).
13. The complete run of data in the tables of this Statistical Bulletin is also available to view and download in other electronic formats free of charge using the ONS Time Series Data website service. Users can download the complete release in a choice of zipped formats, or view and download their own selections of individual series. The Time Series Data service can be accessed at <http://www.statistics.gov.uk/timeseries>.
14. Details of the policy governing the release of new data are available from the media office.
15. National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

1 Trade in petroleum and petroleum products. These figures differ from those published by the Department of Energy and Climate Change which are compiled from different sources and are on a time of shipment basis.

2 The average value per tonne may reflect not only changes in price but also changes in the commodity mix.

[†] Earliest date for revisions to trade in goods is April 2009.

¹ These are provisional estimates subject to fluctuations when new or amended data become available.

[†] Earliest date for revisions to trade in goods is April 2009.

² The weights shown are in proportion to the total value of trade in 2005 and are used to combine the volume indices to calculate the totals for 2006 onwards. For 2005 and earlier, totals are calculated using the equivalent weights for the previous year (eg totals for 2005 use 2004 weights).

³ These are defined as precious stones and silver in semi-manufactures, and as ships and aircraft in finished manufactures.
